Inanimation David Wills, 2016-04-13 Inanimation is the third book by author David Wills to analyze the technology of the

human In Prosthesis Wills traced our human attachment to external objects back to a necessity within the body itself In Dorsality he explored how technology is understood to function behind or before the human Inanimation proceeds by taking literally the idea of inanimate or inorganic forms of life Starting from a seemingly naive question about what it means to say texts live on or have a life of their own Inanimation develops a new theory of the inanimate Inanimation offers a fresh account of what life is and the ethical and political consequences that follow from this conception Inspired by Walter Benjamin's observation that the idea of life and afterlife in works of art should be regarded with an entirely unmetaphorical objectivity the book challenges the coherence and limitations of what lives arguing that there is no clear opposition between a live animate and dead inanimate Wills identifies three major forms of inorganic life autobiography translation and resonance Informed by Jacques Derrida and Gilles Deleuze he explores these forms through wide ranging case studies He brings his panoptic vision to bear on thinkers Descartes Freud Derrida Benjamin Carl Schmitt Jean Luc Nancy Roland Barthes writers and poets Hélène Cixous Paul Celan William Carlos Williams Ernst Jünger James Joyce Georges Bataille and visual artists Jean François Millet Jean Luc Godard Paul Klee With panache and gusto Wills discovers life forms well beyond textual remainders and translations in such disparate places as the act of thinking the death drive poetic blank space recorded bird songs the technology of warfare and the heart stopped by love
