Collaborative Governance And Information Technology:

Routledge Handbook on Information Technology in Government Yu-Che Chen, Michael J. Ahn, 2017-02-17 The explosive growth in information technology has ushered in unparalleled new opportunities for advancing public service. Featuring 24 chapters from foremost experts in the field of digital government, this Handbook provides an authoritative survey of key emerging technologies, their current state of development and use in government, and insightful discussions on how they are reshaping and influencing the future of public administration. This Handbook explores key emerging technologies, i.e. big data, social media, Internet of Things (IOT), GIS, smart phones, mobile technologies, and their impacts on public administration. The impacts of the new technologies on the relationships between citizens and their governments, with the focus on collaborative governance, key theories of IT innovations in government, on the interplay between technological innovations and public administration, the relationship between technology and democratic accountability, and the various ways of harnessing the new technologies to advance public value, key strategies and conditions for fostering success in leveraging technological innovations for public service. This Handbook will prove to be an invaluable guide and resource for students, scholars, and practitioners interested in this growing field of technological innovations in government. **Collaborating for Digital**

It is free to read, download, and share on Elgaronline.com. As worldwide institutions acknowledge the necessity of digital, open, and collaborative governments, this timely book offers a comprehensive exploration of digital transformation, intergovernmental collaboration, collaborative governance, and public sector innovation. Governance and Information Technology Viktor Mayer-Schonberger, David Lazer, 2007-08-31

Accompanied by short case studies from around the world which cover such topics as electronic government efforts in Singapore and Switzerland, the US EPA's effort to solicit input on planned regulations over the Internet and online activism, cyberprotesting, globalization, Australian contributor. *Wiki Government* Beth Simone Noveck, 2009-08-01 Collaborative democracy: government with the people is a new vision of governance in the digital age. *Wiki Government* explains how to translate the vision into reality. Beth Simone Noveck draws on her experience in creating Peer to Patent, the federal government's first social networking initiative, to show how technology can connect the expertise of the many to the power of the few. In the process, she reveals what it takes to innovate in government. Launched in 2007, Peer to Patent connects patent examiners to volunteer scientists and technologists via the web. These dedicated but overtaxed officials decide which of the million-plus patent applications currently in the pipeline to approve. Their decisions help determine which start-up pioneers a new industry and which disappears without a trace. Patent examiners have traditionally worked in secret, cut off from essential information and racing against the clock to rule on lengthy technical claims. Peer to Patent broke this mold by creating online networks of self-selecting citizen experts and channeling their knowledge and enthusiasm into forms that

patent examiners can easily use Peer to Patent shows how policymakers can improve decisionmaking by harnessing networks to public institutions By encouraging coordinating and structuring citizen participation technology can make government both more open and more effective at solving today s complex social and economic problems Wiki Government describes how this model can be applied in a wide variety of settings and offers a fundamental rethinking of effective governance and democratic legitimacy for the twenty first century

Collaborative Governance in the United States and Korea Yong-dök Chông,2009 *The Art of Digital Governance* Younhee Kim,Michael J. The Use of Collaborative Technology in Collaboration Xian Gao, 2020 The use of information technology is now ubiquitous in local government Collaboration on the other hand has been generally accepted as imperative to relieve resource dependence and better fulfill public responsibilities Considering the

amount of IT spending as well as collaboration projects in local government decision makers need to understand how technology particularly collaborative tools can be used to foster better collaboration performance within their government

Two research fields inspired this study In the e government field the research on IT adoption antecedents and IT performance explained the inclusion of the organizational and technological factors in the conceptual framework In the collaboration field findings of the collaborative governance frameworks provided support for the distinct examination of collaboration process and collaboration outcomes Also they confirmed the inclusion of leadership planning and stakeholder involvement as conditional factors Moreover studies on virtual teams helped explain the incorporation of face to face communication as a moderating factor of the hypothesized relationships This study uses the exploratory sequential mixed methods design The case study method with both quasi experiment and interview data collection provided fruitful evidence of the predicted relationships in interpersonal collaboration context and suggested insights into developing contextual hypotheses The MTurk survey gathered empirical experience and examined the causality predicted in the framework in interpersonal and interdepartmental collaboration settings The findings of this dissertation indicated that the use of collaborative technology could improve interpersonal and interdepartmental collaboration outcomes through facilitating interactions among participants This relationship will be stronger when communication is collaborative and weaker if it is isolated Besides the findings demonstrated that the magnitude and direction of this indirect effect depended on the level of leadership support face to face communication and task technology fitness This dissertation makes theoretical advancements to e government and collaboration research Also it offers practical recommendations to public managers on how to strategically manage organizational efforts at different stages of collaborative technology use to achieve a more interactive collaboration process and better collaboration performance
