Recent Advances reviews new developments in areas such as flexible glass display and photovoltaics and covers a number of process innovations implemented recently to extend and improve the capabilities of traditional R2R lines. It covers such topics as coating and solidification processes in line vacuum deposition, drying, web handling and winding, polymer film substrates, novel hybrid composite films, flexible solar cells and more. Additionally, this book examines key elements, unit operations of the R2R technology and discusses how these elements are utilized and integrated to achieve desired process efficiencies in a host of applications. Illustrates several established and novel application areas where R2R processing is utilized in current or future products. Discusses process design methodology and key advantages of R2R manufacturing technology over batch or sheet to sheet operations. Roll to Roll Manufacturing Process Elements and Recent Advances is an ideal book for undergraduate and graduate students in various science and engineering disciplines as well as for scientists, engineers and technical and business leaders associated in any way with the development, commercialization and manufacture of a variety of film products.

Multilayer Flexible Packaging John R. Wagner Jr., 2009-11-03. A comprehensive and highly practical survey of the materials, hardware processes and applications of flexible plastic films. Aimed at a wide audience of engineers, technicians, managers, purchasing agents and users. Multilayer Flexible Packaging provides a thorough introduction to the manufacturing and applications of flexible plastic films covering Materials, Hardware and Processes. Multilayer film designs and applications. The materials coverage includes detailed sections on polyethylene, polypropylene and additives. The dies used to produce multilayer films are explored in the hardware section and the process engineering of film manufacture explained with a particular focus on meeting specifications and targets. The section includes unique coverage of the problematic area of bending technology providing a unique explanation of the issues involved in the blending of viscoelastic, non-Newtonian polymeric materials. About the author: John R. Wagner Jr. is President of Crescent Associates Inc, a consulting firm that specializes in plastic films and flexible packaging. He graduated from the University of Notre Dame with a BS and MS in Chemical Engineering.

Industrial Color Testing Hans G. Völz, 2001. This book is the first complete treatment focusing on theoretical and practical aspects of testing pigments, dyes and pigmented and dyed coatings. It is a fundamental resource for engineers in industry, scientists in research and development, educators and students. For producers, processors and users of coloring agents, pigmented and dyed materials who need accurate information at their fingertips. Völz and his reference work leave no questions unanswered.
