

Coasting Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture, *Foundations of Coasting Theory*. These are generalised and give insights on problems for all of the course parts. Some are generalised, while some are specific to the course, the latter contribution to Coasting Theory and the needs of students and their (potential) or (current) teaching studies. I also used several other sources for additional material, such as Part II course guide at Cambridge on Coasting Theory and Transportation given by Professor John White, and the first paper given there at Cambridge that on Submarine Transportation routes given by Professor Tim Garber. I also included some more recent literature (2023 course, Applied Maths for the Phys. Department). The last sentence of the notes is based on John White's course notes, "Coastal Road Closure".

All credits go to those who did my best!
