Parallel Computing on Distributed Memory Multiprocessors Füsün Özgüner, Fikret Ercal, 2012-12-06 Advances in microelectronic technology have made massively parallel computing a reality and triggered an outburst of research activity in parallel processing architectures and algorithms Distributed memory multiprocessors parallel computers that consist of microprocessors connected in a regular topology are increasingly being used to solve large problems in many application areas In order to use these computers for a specific application existing algorithms need to be restructured for the architecture and new algorithms developed The performance of a computation on a distributed memory multiprocessor is affected by the node and communication architecture the interconnection network topology the I/O subsystem and the parallel algorithm and communication protocols Each of these parameters is a complex problem and solutions require an understanding of the interactions among them This book is based on the papers presented at the NATO Advanced Study Institute held at Bilkent University Turkey in July 1991 The book is organized in five parts Parallel computing structures and communication Parallel numerical algorithms Parallel programming Fault tolerance and Applications and algorithms

Stochastic Solution of Saturated Groundwater Flow on Sloping Impermeable Beds Emin Can Dogrul, 1996

Mathematical Modelling D. N. P. Murthy, N. W. Page, Ervin Y. Rodin, 1990 The critical step in the use of mathematics for solving real world problems is the building of a suitable mathematical model This book advocates a novel approach to the teaching of the building process for mathematical models with emphasis on the art as well as the science aspects Using a case study approach the book teaches the mathematical modelling process in a comprehensive framework presenting an overview of the concepts and techniques needed for modelling The book is structured in three parts the first dealing with the science aspect the second dealing with the art aspects and the third combining self learning exercises for the student and supplementary resource material for the instructor
