Economic Forecasting P. W. Abelson,Roselyne Joyeux,2000 This volume surveys the array of forecasting techniques which are used by experts to make financial decisions in uncertain economic environments It demonstrates how some of them are used with an emphasis on current models and practical applications *The Behavioral Economics of Foreign Exchange Markets* Robert Schmidt,2006 This book deals with psychological factors which may be important for understanding the observable exchange rate movements Thus the study belongs to the new research field of behavioral economics which considers the relevance of psychological factors in economic contexts The main objective of behavioral economists is to develop a more realistic view of the actual human behavior in the context of economics Central to the concept of behavioral economics is the assumption that humans actual behavior deviates from the ideal of economic rationality due to at least two reasons first decisions are usually based on an incomplete information basis and second the information processing of human beings is limited by their computational capacities Due to these limitations people are forced to apply simple heuristics in information processing Our aim is to analyze the relevance of simple heuristics in the context of foreign exchange markets In our view the decision situation in foreign exchange markets can serve as a prime example for decision situations in which simple heuristics are especially relevant as the complexity of the decision situation is very high *Empirical Study on Asian Financial Markets* □□□□,2008-04 *Progress in Neural Information Processing* Shunichi Amari,1996 These two volumes are the papers presented at the International Conference on Neural Information Processing ICONIP 96 held in Hong Kong 24 27 September 1996 Over three hundred selected papers make up two volumes of 700 pages each Featured topics of Volume 1 are Learning Theories and Algorithms Speech and Signal Processing Pattern Recognition and Image Processing Recurrent Networks Automata and Dynamics Volume 2 focusses on Financial Engineering and Time Series Forecasting Evolutionary Computing Neurosciences and Biophysics Neural Control and Robotics Hardware Implementations Hybrid Systems and Applications plus a number of Special Sessions Other topics covered include image processing computer vision fuzzy logic pattern recognition algorithms and architectures and financial engineering These two volumes combine to cover the major topics in neural information processing and reflect the latest progress with a good balance between scientific studies and industrial applications a well as featuring neural information processing approaches on financial engineering *International Economics* W. Charles Sawyer,Richard L. Sprinkle,2006 This easy to read book

emphasizes how to use basic economic theory and where to apply it to international economic issues. It empowers readers to understand the international economics they will encounter in business publications such as the Wall Street Journal and to use international economics to make business decisions. The first half of the book covers international trade factor movements and trade and economic development; the final ten chapters on international finance can be divided into at least three parts: national income accounting and exchange rate determination, purchasing power parity and the real exchange rate, and open economy macroeconomics. A useful reference for government officials dealing with international trade and finance issues and for private citizens who want to learn more about the effect of international economics on business in the 21st century.
