Handbook of Metal-Microbe Interactions and Bioremediation

Surajit Das, Hirak Ranjan Dash, 2017-04-07 Around the World metal pollution is a major problem. Conventional practices of toxic metal removal can be ineffective and/or expensive, delaying and exacerbating the crisis. Those communities dealing with contamination must be aware of the fundamentals and advances of microbe-mediated metal removal practices because these methods can be easily used and require less remedial intervention. This book describes innovations and efficient applications for metal bioremediation for environments polluted by metal contaminants. *Encyclopedia of Agricultural, Food, and Biological Engineering*

Dennis R. Heldman, Carmen I. Moraru, 2010-10-21 Examining the role of engineering in the delivery of quality consumer products, this expansive resource covers the development and design of procedures, equipment, and systems utilized in the production and conversion of raw materials into food and nonfood consumer goods. With nearly 2000 photographs, figures, tables, and equations, including 128 color figures, the book emphasizes and illustrates the various engineering processes associated with the production of materials with agricultural origin. With contributions from more than 350 experts and featuring more than 200 entries and 3600 references, this is the largest and most comprehensive guide on raw production technology.
