## WHAT IS NFPA 70?

- NFPA 70 is also known as the National Electrical Code (NEC). It is a set of rules that tells how to safely design, install, and check electrical systems. These rules help protect people, buildings, and equipment from dangers like electric shock, fires, and short circuits.
- The NEC is created by the National Fire Protection Association (NFPA), a group that writes safety codes used all over the world. They make sure that the codes are updated regularly to match new technology and safety needs. The 2008 edition of NEC is one of those updates that brought many changes to improve safety.
- This code is used in the United States and in some other countries as well. It is followed by electricians, engineers, building inspectors, and others who work with electricity. By using the NEC, they can make sure their work is safe and legal. It also helps buildings pass inspections and meet government rules.
