WordPress theme consists of three essential elements plus a long list of themes and plugins that will take the appearance and functionality in virtually endless ways. The number of themes and plugins can be pulled from the WordPress directories in the admin dashboard they are bundled for free from a variety of third-party vendors. The number of themes and plugins of a WordPress theme is not limited to a few kinds of content. Depending on the kind of CMS theme needed, you can find themes that support blogs, e-commerce, portfolios, and more. Some themes are designed with minimal customization requirements, even for specific needs, but others are designed to be more flexible. Plugins are used to add additional functionality to a WordPress theme. People often install a combination of plugins from the WordPress Plugin Directory to create customized functionality for managing content. Along with functions for creating and managing content, plugins can add tools for blog management, WordPress themes, and plugins for large networks. They are specifically designed to be versatile and flexible. WordPress has a large number of themes for novice users and for creating content anywhere in the world. The difference between WordPress.com and WordPress.org arise from the differences between hosted and self-hosted, but choosing between them largely depends on the level of control you want over the design and management of a site. Ready to explore new features in WordPress 5? Read This Book to Get Started.
