Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing

Y. A. Liu, Niket Sharma, 2023-07-25 Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing Detailed resource on the Why What and How of integrated process modeling advanced control and data analytics explained via hands on examples and workshops for optimizing polyolefin manufacturing Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing discusses as well as demonstrates the optimization of polyolefin production by covering topics from polymer process modeling and advanced process control to data analytics and machine learning and sustainable design and industrial practice The text also covers practical problems handling of real data streams developing the right level of detail and tuning models to the available data among other topics to allow for easy translation of concepts into practice Written by two highly qualified authors Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing includes information on Segment based modeling of polymer processes selection of thermodynamic methods estimation of physical properties for polymer process modeling Reactor modeling convergence tips and data fit tool free radical polymerization LDPE EVA and PS Ziegler Natta polymerization HDPE PP LLPDE and EPDM and ionic polymerization SBS rubber Improved polymer process operability and control through steady state and dynamic simulation models Model predictive control of polyolefin processes and applications of multivariate statistics and machine learning to optimizing polyolefin manufacturing Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing enables readers to make full use of advanced computer models and latest data analytics and machine learning tools for optimizing polyolefin manufacturing making it an essential resource for undergraduate and graduate students researchers and new and experienced engineers involved in the polyolefin industry

Optimization of Process Flowsheets through Metaheuristic Techniques José María Ponce-Ortega, Luis Germán Hernández-Pérez, 2018-07-19 This textbook presents a general multi objective optimization framework for optimizing chemical processes by implementing a link between process simulators and metaheuristic techniques The proposed approach is general and shows how to implement links between different process simulators such as Aspen Plus HYSIS Super Pro Designer linked to a variety of metaheuristic techniques implemented in Matlab Excel C and others eliminating the numerical complications through the optimization process Furthermore the proposed framework allows the use of thermodynamic design and constitutive equations implemented in the process simulator to implement any process Aimed at graduate and undergraduate students it presents introductory chapters for process simulators and metaheuristic optimization techniques and provides several worked exercises as well as proposed exercises In addition accompanying tutorial videos clearly explaining the implemented methodologies are available online Also some Matlab routines are included as electronic supporting material

Pharmaceuticals 101 - Everything You Need to Know About

the Industry Bashir U Ahmed,2024-12-31 The pharmaceutical industry plays a critical role in advancing global health and improving the quality of life for millions of people However the intricacies of this vast and dynamic field are often difficult to grasp for both industry professionals and curious learners With so many specialized departments processes and technologies at play it can be overwhelming to gain a comprehensive understanding of how the industry operates as a whole

Pharmaceuticals 101 Everything You Need to Know About the Industry was born out of a desire to bridge this gap and provide a clear structured guide to the inner workings of one of the most impactful industries in the world This book is designed as a practical and educational resource for professionals working in the pharmaceutical industry students aspiring to build a career in it and anyone interested in understanding its core functions Each chapter delves into a specific department offering an in depth summary of its purpose key responsibilities and how it contributes to the industry s overarching mission From Research and Development R it is essential for staying competitive in a highly regulated and constantly evolving market By providing actionable insights and examples this book equips readers with the knowledge needed to not only understand the current state of the industry but also to envision its future Lastly I want to emphasize that this book is not limited to those who are already part of the pharmaceutical industry Whether you are a healthcare professional a student or simply someone curious about the behind the scenes processes that bring medicines to life this book is for you It will provide you with a well rounded understanding of the industry s complexity and shed light on how each department plays a crucial role in its success I hope this book serves as a valuable guide a source of inspiration and a steppingstone for your journey into the fascinating world of pharmaceuticals Let s explore this incredible industry together
