## **Automation Production Systems Computer Integrated Manufacturing:**

**Automation, Production Systems, and Computer-integrated Manufacturing** Mikell P. Groover, 2008 This exploration of the technical and engineering aspects of automated production systems provides a comprehensive and balanced coverage of the subject It covers cutting edge technologies of production automation and material handling and how these technologies are used to construct modern manufacturing systems

**Automation, Production Systems and Computer-Integrated Manufacturing** Raymond Foster, 2019-06-18 Automation is the technology that is designed to function without human assistance Various control systems are used for the operation of equipment used in factories boilers ships aircraft etc Automation is achieved by integrating hydraulic electrical mechanical pneumatic and electronic devices and computers It results in labor electricity cost and material cost saving It also ensures improvement of quality precision and accuracy Computer integrated manufacturing is the approach to the use of computers for controlling the production process It allows the exchange of information between processes It is used in multiple domains such as in mechanical engineering electronic design automation industrial and production engineering etc This book unfolds the innovative aspects of automation production systems and computer integrated manufacturing which will be crucial for the holistic understanding of modern manufacturing Most of the topics introduced herein cover new techniques and the applications of these processes As this field is emerging at a rapid pace the contents of this book will help the readers understand the modern concepts and applications of the subjects
