Heuring, 1997-01-01 **Computer Systems Design and Architecture** Vincent P. Heuring, 2004 **Computer System Design** Michael J. Flynn, Wayne Luk, 2011-08-08 The next generation of computer system designers will be less concerned about details of processors and memories and more concerned about the elements of a system tailored to particular applications These designers will have a fundamental knowledge of processors and other elements in the system but the success of their design will depend on the skills in making system level tradeoffs that optimize the cost performance and other attributes to meet application requirements This book provides a new treatment of computer system design particularly for System on Chip SOC which addresses the issues mentioned above It begins with a global introduction from the high level view to the lowest common denominator the chip itself then moves on to the three main building blocks of an SOC processor memory and interconnect Next is an overview of what makes SOC unique its customization ability and the applications that drive it The final chapter presents future challenges for system design and SOC possibilities *Principles of Computer Hardware* Alan Clements, 2006-02-09 The fourth edition of this work provides a readable tutorial based introduction to the subject of computer hardware for undergraduate computer scientists and engineers and includes a companion website to give lecturers additional notes
