Topic: Business | Words: 868 | Pages: 3

## Introduction

The way companies treat their clients predetermines the perception of the brand by the general public. It is important because the contemporary penetration of social media publicity into everyday life makes every corporate action matter to society. Ultimately, the impact of customer service outcomes is seen in the profits of a company and its presence in the market overall. The quality of customer service is a costly and yet beneficial element of business functioning since it creates long-term value for the organization, trust from clients, and an overall positive reputation. This paper examines the case of United Airlines' customer service crisis and aims to analyze and reflect on the relationship between customer service and buyer decision-making.

## General Public's Perception of the Situations

The incidents with United Airlines' failure to provide adequate customer service to its passengers were negatively perceived by the public. The number of views that the videos published online obtained throughout the time is very large. CQ Weekly, 2002      **Landmark Cases in Privacy Law** Peter Coe, Paul Wragg, 2022 This new addition to Hart's acclaimed Landmark Cases series is a diverse and engaging edited collection bringing together eminent commentators from the United Kingdom, the United States, Australia, Canada, and New Zealand to analyse cases of enduring significance to privacy law. The book tackles the conceptual nature of privacy in its various guises, from data protection to misuse of private information and intrusion into seclusion. It explores the practical issues arising from questions about the threshold of actionability, the function of remedies, and the nature of damages. The cases selected are predominantly English but include cases from the United States because of the formative influence of United States privacy jurisprudence on the development of privacy law, cases from Australia, Canada, India, the Court of Justice of the European Union, and the European Court of Human Rights. Each chapter considers the reception and application, and in some instances rejection, outside of the jurisdiction where the case was decided.

Differential Privacy and Information Security Rimisha Ghorsaini, 2022 This research is based on the current emerging technology Differential Privacy. The research questions deal with privacy issues in information systems processing, handling, organizing, and retrieving data. The goal is to collect the information and the uses of differential privacy algorithm in the data privacy processes and reveal the application of differential privacy in various fields, including the field of internet technology. This study conducted a survey of 89 University of Texas at Arlington students to understand their perception of information security. The survey revealed that participants were less attentive towards their daily activities such as shopping online, registration, and subscriptions, which could provide one explanation for their data exposure. The study also revealed respondents were open to adopting differential privacy.
