Harden your lab environment against VM escapes and other security threats. Configure the pfSense firewall distribution to provide security segmentation and network services to your virtual lab. Deploy either Snort or Suricata open source IDS platforms in IPS mode to further enhance the flexibility, segmentation, and security of your lab network. Deploy Splunk as a log management solution for your lab. Reconfigure the provided baseline lab environment to better suit your individual needs. Easy-to-follow steps and illustrations provide detailed, comprehensive guidance as you build your custom-tailored lab.
