The Cloud has grown; it represents the consummate disruptor to structure a pervasive social and economic network that will soon connect and define more of the world than any other political, social, or economic organization. The Cloud is the first megatrend of the twenty-first century, one that will shape the way we will address virtually every challenge we face for at least the next 100 years. It is where we will all live, work, and play in the coming decades. The Cloud is where your kids go to dive into online play. It is where you meet and make friends in social networks. It is where companies find the next big idea. It is where political campaigns are won and lost. **Cloud Surfing** is the groundbreaking book that will explain how to access the full value of the Cloud and how to embrace its possibilities. *A Quick Start Guide to Cloud Computing* Mark I. Cloud Computing Charles Henson,2012-03-01 The reason I published this book was to fortify business owners and executives with the basic knowledge they need to make a great decision when choosing a Cloud Computing Integrator I believe a qualified computer consultant can contribute to your business success just like a great marketing consultant attorney accountant or financial advisor can The technology industry is ever changing and growing at such a rapid pace that most business owners can't keep up with all the latest whiz bang gadgets alphabet soup acronyms and choices available to them Plus many of the latest and greatest technological developments have a shelf life of six months before they become obsolete or completely out of date Sorting through this rapidly moving mess of information to formulate an intelligent plan for growing a business requires a professional who not only understands technology and how it works but also understands how people and businesses need to work with technology for progress Unfortunately the complexity of technology makes it easy for a business owner to fall victim to an incompetent or dishonest computer consultant When this happens it creates feelings of mistrust toward all technology consultants and vendors which makes it difficult for those of us striving to deliver exceptional value and service to our clients Therefore my purpose is to not only give you the information you need to find an honest competent computer consultant but in doing so to raise the standards and quality of services for all consultants in my industry I certainly want your feedback on the ideas in this book If you choose a Cloud Integrator as I've outlined and they work please send me your story If you've had a bad experience I want to hear those horror stories as well If you have additional tips and insights that we haven't considered please share them with me I might even use them in a future book Again the more aware you are of what it takes to find and hire great consultants in every aspect of your business not just technology the stronger your business will become I am truly passionate about building an organization that delivers uncommon service to my clients I want to help business owners see the true competitive advantages technology can deliver to your business and not just view it as an expensive necessity and source of problems
