Documenting Software Architectures Views And Beyond:

Documenting Software Architectures Paul Clements,2003 Architecture is crucial to the success of any large software system but even a superb architecture will fail if it isn't communicated well Now there's a language and notation independent guide to capturing architecture so it can be used successfully by every analyst software designer and developer The authors review the diverse goals and uses of software architecture documentation providing documentation strategies for several common scenarios They identify the basic unit of software architecture documentation the viewtype which specifies the type of information to be provided in an architectural view For each viewtype Modules Component and Connectors and Allocation they offer detailed guidance on documenting what really matters Next they demonstrate how to package architecture documentation in coherent usable form augmenting architectural views with documentation of interfaces and behavior accounting for architectural variability and dynamic systems and more Documenting Software Architectures : Views and Beyond ,2010 **Documenting Software Architectures** Paul Clements,2003 *Documenting Software Architectures* ,2011 **Documenting Software Architectures** Paul Clements,Felix Bachmann,Len Bass,David Garlan,James Ivers,Reed Little,Paulo Merson,Robert Nord,Judith Stafford,2010-10-05 Software architecture the conceptual glue that holds every phase of a project together for its many stakeholders is widely recognized as a critical element in modern software development Practitioners have increasingly discovered that close attention to a software system's architecture pays valuable dividends Without an architecture that is appropriate for the problem being solved a project will stumble along or most likely fail Even with a superb architecture if that architecture is not well understood or well communicated the project is unlikely to succeed Documenting Software Architectures Second Edition provides the most complete and current guidance independent of language or notation on how to capture an architecture in a commonly understandable form Drawing on their extensive experience the authors first help you decide what information to document and then with guidelines and examples in various notations including UML show you how to express an architecture so that others can successfully build use and maintain a system from it The book features rules for sound documentation the goals and strategies of documentation architectural views and styles documentation for software interfaces and software behavior and templates for capturing and organizing information to generate a coherent package New and improved in this second edition Coverage of architectural styles such as service oriented architectures multi tier architectures and data models Guidance for documentation in an Agile development environment Deeper treatment of documentation of rationale reflecting best industrial practices Improved templates reflecting years of use and feedback and more documentation layout options A new comprehensive example available online featuring documentation of a Web based service oriented system Reference guides for three important architecture documentation languages UML AADL and SySML *Documenting Software Architectures* Paul Clements,2010 **Summary Record of the 1st Part (public) of the 2199th Meeting, Held at the**

Palais Wilson, Geneva, on Tuesday, 13 July 2004 ,2004 Documenting Software Architectures ,2003 Comparing the SEI's Views and Beyond Approach for Documenting Software Architectures with ANSI-IEEE 1471-2000 Paul Clements,2005 Abstract Architecture documentation has emerged as an important architecture related practice In 2002 researchers at the Carnegie Mellon registered trademark Software Engineering Institute completed Documenting Software Architectures Views and Beyond V B an approach that holds that documenting a software architecture is a matter of choosing a set of relevant views of the architecture documenting each of those views and then documenting information that applies to more than one view or to the set of views as a whole Details of the approach include a method for choosing the most relevant views standard templates for documenting views and the information beyond them and definitions of the templates content At about the same time the Institute of Electrical and Electronics Engineers IEEE was developing a recommended best practice for describing architectures for software intensive systems ANSI IEEE Std 1471 2000 Like V B that standard takes a multi view approach to the task of architecture documentation and it establishes a conceptual framework for architectural description and defines the content of an architectural description This technical note summarizes the two approaches and shows how a software architecture document prepared using the V B approach can be made compliant with Std 1471 2000

Software Architecture ,2005 **Software Architect Bootcamp** Raphael C. Malveau,Thomas J. Mowbray,2004 bull Fully revised and updated to reflect the latest trends in software architecture bull Allows you to execute heavyweight or lightweight approaches to architecture and identify the best architectural model for any project bull Added coverage of UML 2 0 and Model Driven Architecture *Creating and Using Software Architecture Documentation Using Web-based Tool Support* Judith Alyce Stafford,2004 Abstract Documenting software architecture DSA is a crucial facet in the development of a software system yet often it is carried out in a haphazard fashion if at all Lack of attention to the documentation results from insufficient guidance about what should be documented and when and how to capture the information so that system stakeholders find it useful The book Documenting Software Architectures Views and Beyond provides such guidance in the DSA approach and this report describes the conceptual design for a documentation system based on that approach A system is envisioned that enables the architect to capture architectural decisions and related artifacts as a living repository that can communicate information to stakeholders who might be both geographically and temporally distributed The system must communicate in a way that allows each stakeholder quick and easy access to information relevant to the person s role in the software development process This report describes a design prototype that demonstrates a Web based approach to creating communicating and using software architecture throughout the life of the system *Documenting Software Architectures in an Agile World* Paul Clements,2003 Abstract This report compares the Software Engineering Institute s Views and Beyond approach for documenting software architectures with the documentation philosophy embodied in agile software development methods This report proposes an approach for capturing architecture information in a way that is consistent
