Any three: Additive interaction happens when medicines work together in a positive way; a synergistic effect occurs when the interaction of two or more medicines results in a greater effect than when the medicines are taken alone; an antagonistic effect happens when the effect of one medicine is canceled or reduced when taken with another medicine; tolerance happens when the body becomes used to the effect of a medicine; withdrawal happens when a person stops using a medicine that he or she has a physiological dependence on. (Pg. 589)

3. What is the difference between prescription medicines and over-the-counter medicines?

Prescription medicines are available only with a doctor's written instructions and can be distributed only by a licensed pharmacist; over-the-counter medicines can be bought without a prescription and can be used without medical supervision. (Pg. 590)
