Emotions, Technology, and Design Sharon Tettegah, Safiya Noble, 2015-12-28 Emotional design explicitly addresses the emotional relationship between the objects and the subjects of design. In this book, the objects are technologies and the subjects are technology users. A conclusion chapter covers future research and directions.

**Emotions, Technology, and Design** provides a thorough look at how technology design affects emotions and how to use that understanding in practical applications. It discusses the role of culture, trust, and identity in empathetic technology. It presents a framework for using sound to elicit positive emotional responses, details the emotional use of color in design, explores the use of emoticons, earcons, and tactons, and addresses the emotional design specific to agent-based environments.

**The Neuroscientific Basis of Successful Design** Marco Maiocchi, 2014-12-01 The term design today encompasses attributes of artifacts that go beyond their intended functions, imbuing them with new meanings. Those meanings are deeply related to the emotions perceived by the users. This book investigates the findings deriving from the neurosciences that are relevant to design. Drawing upon up-to-date neuroscientific knowledge, the authors define what an emotion is, examine the relationship between perceptions and emotions, and discuss the role of metaphoric communication. Particular attention is paid to those elements of perception and metaphoric interpretation that cause the emotions to rise. Consequences for the design process are then considered, and a design process is proposed that takes into account emotional impacts as one of the goals. A solid scientific approach to the subject is maintained throughout, and understanding is facilitated by the inclusion of a rich collection of successful design artifacts, the emotional aspects of which are analyzed.
