Machine Learning and Knowledge Discovery in Databases. Research Track Albert Bifet,Jesse Davis,Tomas Krilavičius,Meelis Kull,Eirini Ntoutsi,Indrė Žliobaitė,2024-08-29 This multi volume set LNAI 14941 to LNAI 14950 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2024 held in Vilnius Lithuania in September 2024 The papers presented in these proceedings are from the following three conference tracks Research Track The 202 full papers presented here from this track were carefully reviewed and selected from 826 submissions These papers are present in the following volumes Part I II III IV V VI VII VIII Demo Track The 14 papers presented here from this track were selected from 30 submissions These papers are present in the following volume Part VIII Applied Data Science Track The 56 full papers presented here from this track were carefully reviewed and selected from 224 submissions These papers are present in the following volumes Part IX and Part X

Lectures on Advanced Topics in Categorical Data Analysis Tamás Rudas,2024-12-16 This book continues the mission of the previous text by the author Lectures on Categorical Data Analysis by expanding on the introductory concepts from that volume and providing a mathematically rigorous presentation of advanced topics and current research in statistical techniques which can be applied in the social political behavioral and life sciences It presents an intuitive and unified discussion of an array of themes in categorical data analysis and the emphasis on structure over stochastics renders many of the methods applicable in machine learning environments and for the analysis of big data The book focuses on graphical models their application in causal analysis the analytical properties of parameterizations of multivariate discrete distributions marginal models and coordinate free relational models To guide the readers in future research the volume provides references to original papers and also offers detailed proofs of most of the significant results Like the previous volume it features exercises and research questions making it appropriate for graduate students as well as for active researchers

Explainable and Interpretable Models in Computer Vision and Machine Learning Hugo Jair Escalante,Sergio Escalera,Isabelle Guyon,Xavier Baró,Yağmur Güçlütürk,Umut Güçlü,Marcel van Gerven,2018-11-29 This book compiles leading research on the development of explainable and interpretable machine learning methods in the context of computer vision and machine learning Research progress in computer vision and pattern recognition has led to a variety of modeling techniques with almost human like performance Although these models have obtained astounding results they are limited in their explainability and interpretability what is the rationale behind the decision made what in the model structure explains its functioning Hence while good performance is a critical required characteristic for learning machines explainability and interpretability capabilities are needed to take learning machines to the next step to include them in decision support systems involving human supervision This book written by leading international researchers addresses key topics of

explainability and interpretability including the following Evaluation and Generalization in Interpretable Machine Learning Explanation Methods in Deep Learning Learning Functional Causal Models with Generative Neural Networks Learning Interpretable Rules for Multi Label Classification Structuring Neural Networks for More Explainable Predictions Generating Post Hoc Rationales of Deep Visual Classification Decisions Ensembling Visual Explanations Explainable Deep Driving by Visualizing Causal Attention Interdisciplinary Perspective on Algorithmic Job Candidate Search Multimodal Personality Trait Analysis for Explainable Modeling of Job Interview Decisions Inherent Explainability Pattern Theory based Video Event Interpretations

Handbook of Structural Equation Modeling Rick H. Hoyle, 2023-02-17 This accessible volume presents both the mechanics of structural equation modeling SEM and specific SEM strategies and applications The editor along with an international group of contributors and editorial advisory board are leading methodologists who have organized the book to move from simpler material to more statistically complex modeling approaches Sections cover the foundations of SEM statistical underpinnings from assumptions to model modifications steps in implementation from data preparation through writing the SEM report and basic and advanced applications including new and emerging topics in SEM Each chapter provides conceptually oriented descriptions fully explicated analyses and engaging examples that reveal modeling possibilities for use with readers data Many of the chapters also include access to data and syntax files at the companion website allowing readers to try their hands at reproducing the authors results

Artificial Intelligence and Machine Learning in Health Care and Medical Sciences Gyorgy J. Simon, Constantin Aliferis, 2024-03-04 This open access book provides a detailed review of the latest methods and applications of artificial intelligence AI and machine learning ML in medicine With chapters focusing on enabling the reader to develop a thorough understanding of the key concepts in these subject areas along with a range of methods and resulting models that can be utilized to solve healthcare problems the use of causal and predictive models are comprehensively discussed Care is taken to systematically describe the concepts to facilitate the reader in developing a thorough conceptual understanding of how different methods and resulting models function and how these relate to their applicability to various issues in health care and medical sciences Guidance is also given on how to avoid pitfalls that can be encountered on a day to day basis and

stratify potential clinical risks Artificial Intelligence and Machine Learning in Health Care and Medical Sciences Best Practices and Pitfalls is a comprehensive guide to how AI and ML techniques can best be applied in health care The emphasis placed on how to avoid a variety of pitfalls that can be encountered makes it an indispensable guide for all medical informatics professionals and physicians who utilize these methodologies on a day to day basis Furthermore this work will be of significant interest to health data scientists administrators and to students in the health sciences seeking an up to date resource on the topic

Advances in Artificial Intelligence, Computation, and Data Science Tuan D. Pham, Hong Yan, Muhammad W. Ashraf, Folke Sjöberg, 2021-07-12 Artificial intelligence AI has become pervasive in most areas of research and applications While computation can significantly reduce mental efforts for complex problem solving effective computer algorithms allow continuous improvement of AI tools to handle complexity in both time and memory requirements for machine learning in large datasets Meanwhile data science is an evolving scientific discipline that strives to overcome the hindrance of traditional skills that are too limited to enable scientific discovery when leveraging research outcomes Solutions to many problems in medicine and life science which cannot be answered by these conventional approaches are urgently needed for society This edited book attempts to report recent advances in the complementary domains of AI computation and data science with applications in medicine and life science The benefits to the reader are manifold as researchers from similar or different fields can be aware of advanced developments and novel applications that can be useful for either immediate implementations or future scientific pursuit Features Considers recent advances in AI computation and data science for solving complex problems in medicine physiology biology chemistry and biochemistry Provides recent developments in three evolving key areas and their complementary combinations AI computation and data science Reports on applications in medicine and physiology including cancer neuroscience and digital pathology Examines applications in life science including systems biology biochemistry and even food technology This unique book representing research from a team of international contributors has not only real utility in academia for those in the medical and life sciences communities but also a much wider readership from industry science and other areas of technology and education

Applied Intelligence De-Shuang Huang, Wei Chen, Chuanlei Zhang, Yijie Pan, Qinhu Zhang, Xiangzeng Kong, 2025-02-23 This 2 volume set CCIS 2387 2388 constitutes the proceedings of the Second International Conference on Applied Intelligence ICAI 2024 held in Zhengzhou China during November 22 25 2024 The 72 full papers presented in this proceedings were carefully reviewed and selected from 228 submissions The papers cover a wide range on theoretical aspects of biomedical data modeling and mining computer vision and deep learning They were organized in topical sections as follows Part I Biomedical data modeling and mining information security pattern recognition Part II Image Processing intelligent data analysis and prediction machine learning

Griffiths, 2004 **Logique et analyse**, 2004 *IJCAI-01* Bernhard Nebel, 2001 **Computation, Causation, and Discovery** Clark N. Glymour, Gregory Floyd Cooper, 1999 In science business and policymaking anywhere data are used in prediction two sorts of problems requiring very different methods of analysis often arise The first problems of recognition and classification concerns learning how to use some features of a system to accurately predict other features of that system The second problems of causal discovery concerns learning how to predict those changes to some features of a system that will result if an intervention changes other features This book is about the second much more difficult type of problem Typical problems of causal discovery are How will a change in commission rates affect the total sales of a company How will a reduction in cigarette smoking among older smokers affect their life expectancy How will a change in the formula a college uses to award scholarships affect its dropout rate These sorts of changes are interventions that directly alter some features of the system and perhaps and this is the question indirectly alter others The contributors discuss recent research and applications using Bayes nets or directed graphic representations including representations of feedback or recursive systems The book contains a thorough discussion of foundational issues algorithms proof techniques and applications to economics physics biology educational research and other areas **The Science of Logic** Peter Coffey, 1912 **Computer Applications in the Social Sciences** Edward E.
