An Introduction To Theories Of Human Development:

An Introduction to Theories of Human Development Neil J Salkind,2004-01-22 This brief accessible core text provides a comprehensive view of the major developmental perspectives in a way that should appeal especially to students going on to applied careers in the social and behavioral sciences education and the human services and other helping professions Neither overly detailed nor unnecessarily technical it is intended as a basic introduction At the same time the author does not talk down or condescend to the reader He emphasizes the applied nature of these developmental theories not only in the text material but also with features such as boxed highlights The book is organized into five major parts beginning with an introduction to the primary concepts and important ideas about human development and research and then grouping various theories into four major theoretical perspectives maturational and biological psychodynamic behavioral and cognitive developmental before concluding with an integrative chapter that compares the various theories covered

Theories of Human Development Barbara M. Newman,Philip R. Newman,2010-10-18 Intended for courses on theories of human development this new text presents nine theories grouped into three major families those that emphasize biological systems those that emphasize environmental factors and those that emphasize a dynamic interaction between biological and environmental forces The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights The inclusion of social role theory and life course theory expand the book s relevance to the study of adulthood and aging Grouping the theories by families enhances students ability to think critically about theoretical ideas assess the strengths and weaknesses of each theory and gain a deeper understanding of how each theory guides research and application The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these theories together Discussion of each theory includes the historical and cultural context in which the theory was developed an overview of key concepts and important ideas new directions in contemporary scientific work a research example illustrating how the theory has been tested and modified an application showing how the theory has guided the design of an intervention or program an analysis of how the theory answers basic questions about human development and a critique highlighting the theories strengths and weaknesses Theories of Human Development serves as a text in advanced undergraduate and or beginning graduate courses in theories of human development Its clear organization and engaging writing style make it accessible to students with a minimal background in human development

An Introduction to Theories of Human Development Neil J. Salkind,2004 An Introduction to Theories of Human Development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors

Concepts and Theories of Human Development Richard M. Lerner,2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This

volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives. Since the publication of the second edition, developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts, having either a nature or nurture emphasis. As a consequence, a developmental systems orientation frames the presentation in this edition. This new edition has been expanded substantially in comparison to the second edition. Special features include a separate chapter focusing on the historical roots of concepts and theories of human development, on philosophical models of development, and on developmental contextualism. Two new chapters surrounding the discussion of developmental contextualism: one on developmental systems theories wherein several exemplars of such models are discussed, and a corresponding chapter wherein key instances of such theories, life span, life course, bioecological, and action theoretical ones are presented. A new chapter on cognition and development is included, contrasting systems approaches to cognitive development with neo-nativist perspectives. A more differentiated treatment of nature-oriented theories of development is provided. There are separate chapters on behavior genetics, the controversy surrounding the study of the heritability of intelligence, work on the instinctual theory of Konrad Lorenz, and a new chapter on sociobiology. A new chapter concentrates on applied developmental science.

Theories of Human Development Neil J. Salkind, 1985-01-18. Provides a clearly written basic introduction to the different theoretical approaches to understanding human development designed for the first year student of human development. Features an overview and discussion of the maturational, biological, psychoanalytic, behavioral, and cognitive developmental theories of human development and includes applied examples of every theory and a set of seven questions used to compare and contrast theories presented throughout the book.

An Introduction to Child Development Thomas Keenan, 2002-03-28. A new edition of this book is available. This is an admirable modern textbook on child development which is compact, beautifully organized, and laid out, and hence is easy to read and use. It also incorporates all the pedagogic methods which one expects in good textbooks nowadays, such as stating the aims of each chapter in bold at the beginning, together with a useful summary in a text box and a glossary at the end of each chapter. I was also very pleased to find that Keenan had included much of the modern thinking about child development which so many other university level introductions seem so far to have neglected.

Young Minds This book is well written with a flowing narrative. It provides an excellent coverage of methods and theories in developmental psychology. J. Gavin Bremner, Department of Psychology, Lancaster University. This outstanding textbook presents a comprehensive introduction to developmental psychology that is engaging yet detailed and thorough. Covering all the major topics in child development, the book offers a grounding in the principles which govern research and theory in contemporary child development and surveys the theories and research methods which are essential to developing a firm knowledge of the field. Key features include: Coverage of the child's theory of mind under the rubric of social development; an introduction to emotion regulation in the chapter on emotional

development Coverage of some key theories such as dynamic systems theory and evolutionary psychology Ideal for students taking a first course in child or lifespan development the book assumes little or no background in the subject *An Introduction to the History of Human Development and Family Science* Andrea Roach,Ashley Ermer,2025-05-02 This comprehensive textbook offers an interdisciplinary introduction to the history of human development and family science It provides insights from home economics sociology and psychology to explain and analyze how the field was established and how it is developing and showcases the contribution of its unique transdisciplinary nature Expert authors cover key topics and highlight historical contributions from women scholars of color and LGBTQIA scholars they emphasize and incorporate research that cuts across cultures and examine current human development and family science trends in research and careers in their chosen fields Subjects and issues covered include historical and contemporary studies of child development adolescent development and young adulthood adulthood and aging family science marriage formation and maintenance parenthood divorce the role of grandparents and sibling relationships Exploring how human development and family science can be used as a springboard into careers such as marriage and family therapy social work case management teaching and research this essential textbook is for all students of human development and family science **Social Work and Human**

Development Karin Crawford,Janet Walker,2010-06-25 It is necessary for social work students to understand fully how people develop and how the different stages of life from birth to older adulthood require them to use different skills and approaches Covering all stages of the life course this essential guide looks at the ways in which people develop before birth as babies and children through to adolescence and on to young middle and older adulthood With this knowledge embedded social workers are able to establish and maintain effective partnerships with both service users and other professionals
