An Astronauts To Life On Earth Unabridged:

An Astronaut's Guide to Life on Earth Chris Hadfield, 2013-10-29 Travel to space and back with astronaut Chris Hadfield's enthralling bestseller as your eye-opening guide. Slate Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col Hadfield's success and survival is an unconventional philosophy he learned at NASA: prepare for the worst and enjoy every moment of it. In *An Astronaut's Guide to Life on Earth*, Col Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and always sweat the small stuff. You might never be able to build a robot pilot, a spacecraft, make a music video, or perform basic surgery in zero gravity like Col Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut and will change completely the way you view life on Earth, especially your own. Hadfield proves himself to be not only a fierce explorer of the universe but also a deeply thoughtful explorer of the human condition. Maria Popova, *Brain Pickings*

Summary of An Astronaut's Guide to Life on Earth by Chris Hadfield QuickRead, Lea Schullery, What Going to Space Taught Me About Ingenuity, Determination, and Being Prepared For Anything. Becoming an astronaut is a childhood dream of people all over the world. Being able to leave Earth, experience zero gravity, and float among the stars is something only a few people in life are lucky enough to experience. Chris Hadfield is one of the lucky few. After logging nearly 4,000 hours in space and spending decades training, Chris has plenty of stories to tell and lessons that he's learned. The secret to his success and his survival can boil down to one unconventional philosophy he learned at NASA: prepare for the worst. You see, preparing for the worst sounds negative and pessimistic, but for an astronaut, preparing for the worst is a matter of life and death. Throughout *An Astronaut's Guide to Life on Earth*, Chris Hadfield aims to teach his readers what he's learned through his time in space. The lessons from space can be easily applied to life on Earth, no matter what you do for a living. As you read, you'll learn how thinking like an astronaut can help you find peace of mind, how there is no such thing as over-preparation, and how landing a capsule from space is nothing like landing a plane.
