With this volume, the authors and the editors wish to illustrate the current impact of textile archaeology on the scholarly perception of the past, not limited to archaeology alone. The volume presents new insights into the consumption, meaning, use, and re-use of textiles and dyes, all of which are topics of growing importance in textile research. As indicated by the title, we demonstrate the continued importance of interdisciplinarity by showcasing several interwoven approaches to environmental and archaeological remains, textual and iconographic sources, archaeological experiments, and ethnographic data from a large area covering Europe and the Mediterranean, Near East, Africa, and Asia. The chronological span is deliberately wide, including materials dating from c. 6th millennium BCE to c. mid 14th century CE. The volume is organized in four parts that aim to reflect the main areas of textile research in 2020. After the two introductory chapters, Part I: About this Volume and Textile Research in 2020, follow two chapters referring to dyes and dyeing technology, in which analytical and material-based studies are linked to contextual sources. Part II: Interdisciplinarity of Colour, Dye Analyses, and Dyeing Technologies. The six chapters of Part III: Interdisciplinary Approaches to Textile Tools, discuss textiles and textile production, starting from the analyses of tools, whether functional or as representative of technological developments or user identity. Archaeological and cultural contexts, as well as textile traditions, are the main topics of the six chapters in Part IV: Traditions and Contexts, Fibres, Fabrics, Techniques, Uses, and Meanings. The two final chapters in Part V: Digital Tools, refer to the use of digital tools in textile research, presenting two different case studies. An Introduction to
