setting up and running an ERP lab **Using Corpus Methods to Triangulate Linguistic Analysis** Jesse Egbert, Paul Baker, 2019-09-17 This book builds on Baker and Egbert's previous work on triangulating methodological approaches in corpus linguistics and takes triangulation one step further to highlight its broader applicability when implemented with other linguistic research methods. The volume showcases research methods from other linguistic disciplines and draws on ten empirical studies from a range of topics in psycholinguistics, applied linguistics, and discourse analysis to demonstrate how these methods might be most effectively triangulated with corpus linguistic methods. A concluding chapter synthesizes these findings as a means of pointing the way toward future directions for triangulation and its implications for future linguistic research. The combined effect reveals the potential for the triangulation of these methods to not only enhance rigor in empirical linguistic research but also our understanding of linguistic phenomena and variation by studying them from multiple perspectives, making this book essential reading for graduate students and researchers in corpus linguistics, applied linguistics, psycholinguistics, and discourse analysis.

[Auditory Cognitive Function Assessment during Pregnancy: An Event-Related Potential and Neuropsychological Study](#) Siti Atiyah Ali, Tahamina Begum, Faruque Reza, 2023-11-21 This monograph provides the readers with a comprehensive neuroscience and cognitive studies in pregnant women in various trimesters of pregnancy. The authors' goal is to provide significant findings about the states of cognitive function in pregnant women in response to the claims of the baby brain phenomenon which has been debated for years. The event-related potential (ERP) electrophysiological technique is used to capture neural activity at various states of cognitive function, including pre-attentive and attentive processing during varied types of visual and auditory stimuli. Furthermore, executive function evaluations using various neuropsychological tests are performed as a complement to reveal the states of cognitive function. This monograph provides answers to pregnant women who may experience forgetfulness about what is happening in their brains during pregnancy. It is intended to benefit readers with backgrounds in obstetrics and gynecology, psychology, and cognitive neurosciences. Furthermore, for those who are new to ERP and neuroscience research, this monograph lays out the fundamentals and basics of ERP in an experimental setting.

Experimental Research Methods in Sociolinguistics Katie Drager, 2018-02-22 An accessible, user-friendly guide to the variety of different experimental methods used in sociolinguistics. *Experimental Research Methods in Sociolinguistics* walks students through the how-to of experimental methods used to investigate variation in both speech production and perception. Focusing squarely on practice and application, it takes the reader from defining a research question to choosing an appropriate framework to completing a research project. Featuring a companion website with information on experiment-friendly software, sample experiments, and suggestions for work to undertake, the book also covers ethical concerns, how to measure production and perception, how to construct and use corpora.
