

# Analyzing and Interpreting Scientific Data

How can analyzing and interpreting scientific data allow scientists to make informed decisions?

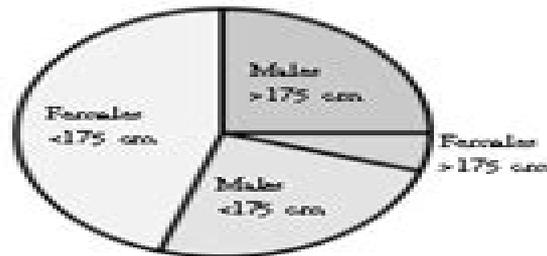

## Why?

During scientific investigations, scientists gather data and present it in the form of charts, tables, or graphs. The data must be properly collected, analyzed, and interpreted to allow scientists to make informed decisions regarding the validity of their study and any further work that may be necessary to achieve their objectives. The ability to present and use data charts, tables, and graphs correctly is essential for good scientific practice and also prevents unnecessary or inappropriate work and misinterpretation of the data.

**DNA Techniques to Verify Food Authenticity** Malcolm Burns, Lucy

Foster, Michael Walker, 2019-10-14 The food supply chain needs to reassure consumers and businesses about the safety and standards of food. Global estimates of the cost of food fraud to economies run into billions of dollars hence a huge surge in interest in food authenticity and means of detecting and preventing food fraud and food crime. Approaches targeting DNA markers have assumed a pre-eminence. This book is the most comprehensive and timely collection of material from those working at the forefront of DNA techniques applied to food authenticity. Addressing the new field of analytical molecular biology as it combines the quality assurance rigour of analytical chemistry with DNA techniques it introduces the science behind DNA as a target analyte its extraction amplification detection and quantitation as applied to the detection of food fraud and food crime. Making the link with traditional forensic DNA profiling and describing emerging and cutting edge techniques such as next generation sequencing this book presents real world case studies from a wide perspective including from analytical service providers industry enforcement agencies and academics. It will appeal to food testing laboratories worldwide who are just starting to use these techniques and students of molecular biology food science and food integrity. Food policy professionals and regulatory organisations who will be using these techniques to back up legislation and regulation will find the text invaluable. Those in the food industry in regulatory and technical roles will want to have this book on their desks.

**Methods and Status of Scientific Research** Walter Earl Spahr, Rinehart John Swenson, 1930 *Data Analysis and Interpretation in the Behavioral Sciences* Eugene B.

Zechmeister, Emil J. Posavac, 2003 Zechmeister and Posavac's unique progressive pedagogical framework presents students with a model of analysis and interpretation called I D E A. This cutting edge model leads students through the processes of data inspection I description D estimating E confidence in their results and announcing A their findings. Their friendly writing style and systematic approach to statistics involves the student in the topics presented. The authors stress the important first stage of data inspection and also demonstrate how both confidence intervals and effect sizes are complementary to traditional null hypothesis testing. Throughout the book the authors emphasize the understanding and interpretation of statistics and place less emphasis on computation acknowledging and encouraging computer assisted data analysis. Concrete examples at the beginning of each chapter illustrate the kinds of questions and data that will be considered in that section. Having this variety of examples increases the likelihood that a student will relate to at least one of them. Scenarios presented at the beginning of the chapter which are referred to throughout the chapter so students can see how an example is affected.
