Advanced Sensing in Image Processing and IoT Rashmi Gupta, Arun Kumar Rana, Sachin Dhawan, Korhan Cengiz, 2022-03-27 The book provides future research directions in IoT and image processing based Energy Industry and Healthcare domain and explores the different applications of its associated technologies However the Internet of Things and image processing is a very big field with a lot of subfields which are very important such as Smart Homes to improve our daily life Smart Cities to improve the citizens life Smart Towns to recover the livability and traditions Smart Earth to protect our world and Industrial Internet of Things to create safer and easier jobs This book considers very important research areas in Energy Industry and Healthcare domain with IoT and image processing applications The aim of the book to highlights future directions of optimization methods in various engineering and science applications in various IoT and image processing applications Emphasis is given to deep learning and similar models of neural network based learning techniques employed in solving optimization problems of different engineering and science applications The role of AI in mechatronics is also highlighted using suitable optimization methods This book considers very important research areas in Energy Industry and Healthcare It addresses major issues and challenges in Energy Industry and Healthcare and solutions proposed for IoT enabled cellular computer networks routing communication protocols surveillances applications secured data management and positioning approaches It focuses mainly on smart and context aware implementations Key sailing Features The impact of the proposed book is to provide a major area of concern to develop a foundation for the implementation process of new image processing and IoT devices based on Energy Industry and Healthcare related technology The researchers working on image processing and IoT devices can correlate their work with other requirements of advanced technology in Energy Industry and Healthcare domain To make aware of the latest technology like AI and Machine learning in Energy Industry and Healthcare related technology Useful for the researcher to explore new things like Security cryptography and privacy in Energy Industry and Healthcare related technology People who want to start in Energy Industry and Healthcare related technology with image processing and IoT world

Sensors for Diagnostics and Monitoring Kevin Yallup, Laura Basiricò, 2018-09-03 Sensor technologies and applications are evolving rapidly driven by the demand for new sensors for monitoring and diagnostic purposes to enable improvements in human health and safety Simultaneously sensors are required to consume less power be autonomous cost less and be connected by the Internet of Things New sensor technologies are being developed to fulfill these needs This book reviews the latest developments in sensor technology and gives the reader an overview of the state of the art in key areas such as sensors for diagnostics and monitoring Features Provides an overview of sensor technologies for monitoring and diagnostics applications Presents state of the art developments in selected topics for sensors that can be used for monitoring and diagnostics in future healthcare structural monitoring and smart environment applications Features contributions from leading international experts in both industry and academia Explores application

areas that include medical diagnostics and screening health monitoring smart textiles and structural monitoring

Classical and Modern Direction-of-Arrival Estimation T. Engin Tuncer, Benjamin Friedlander, 2009-07-10 Classical and Modern Direction of Arrival Estimation contains both theory and practice of direction finding by the leading researchers in the field This unique blend of techniques used in commercial DF systems and state of the art super resolution methods is a valuable source of information for both practicing engineers and researchers Key topics covered are Classical methods of direction finding Practical DF methods used in commercial systems Calibration in antenna arrays Array mapping fast algorithms and wideband processing Spatial time frequency distributions for DOA estimation DOA estimation in threshold region Higher order statistics for DOA estimation Localization in sensor networks and direct position estimation Brings together in one book classical and modern DOA techniques showing the connections between them Contains contributions from the leading people in the field Gives a concise and easy to read introduction to the classical techniques Evaluates the strengths and weaknesses of key super resolution techniques Includes applications to sensor networks [Nanosensors for Smart Cities](#) Baoguo Han, Vijay Tomer, Tuan Anh Nguyen, Ali Farmani, Pradeep Kumar Singh, 2020-02-13 Nanosensors for Smart Cities covers the fundamental design concepts and emerging applications of nanosensors for the creation of smart city infrastructures Examples of major applications include logistics management where nanosensors could be used in active transport tracking devices for smart tracking and tracing and in agri food productions where nanosensors are used in nanochips for identity and food inspection and smart storage This book is essential reading for researchers working in the field of advanced sensors technology smart city technology and nanotechnology and stakeholders involved in city management Nanomaterials based sensors nanosensors can offer many advantages over their microcounterparts including lower power consumption high sensitivity lower concentration of analytes and smaller interaction distance between object and sensor With the support of artificial intelligence AI tools such as fuzzy logic genetic algorithms neural networks and ambient intelligence sensor systems are becoming smarter Provides information on the fabrication and fundamental design concepts of nanosensors for intelligent systems Explores how nanosensors are being used to better monitor and maintain infrastructure services including street lighting traffic management and pollution control Assesses the challenges for creating nanomaterials enhanced sensors for mass market consumer products [Augmented Reality in Tourism, Museums and Heritage](#) Vladimir Geroimenko, 2021-04-24 This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry museum exhibitions and cultural heritage It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world The authors explore the opportunities and challenges of augmented reality applications their current status and future trends informal learning and heritage preservation mixed reality environments and immersive installations cultural heritage education and tourism promotion visitors with special needs and emerging post COVID 19 museums and heritage sites Augmented Reality in

Tourism Museums and Heritage A New Technology to Inform and Entertain is essential reading not only for researchers application developers educators museum curators tourism and cultural heritage promoters but also for students both graduates and undergraduates and anyone who is interested in the efficient and practical use of augmented reality technology
