**Coffee** Jonathan Morris, 2018-10-15 Most of us can't make it through morning without our cup or cups of joe and we're not alone. Coffee is a global beverage; it's grown commercially on four continents and consumed enthusiastically on all seven, and there is even an Italian espresso machine on the International Space Station. Coffee's journey has taken it from the forests of Ethiopia to the fincas of Latin America, from Ottoman coffee houses to Third Wave cafés and from the simple coffee pot to the capsule machine. In *Coffee: A Global History*, Jonathan Morris explains both how the world acquired a taste for this humble bean and why the beverage tastes so differently throughout the world. Sifting through the grounds of coffee history, Morris discusses the diverse cast of caffeinated characters who drank coffee, why and where they did so, as well as how it was prepared and what it tasted like. He identifies the regions and ways in which coffee has been grown, who worked the farms and who owned them, and how the beans were processed, traded, and transported. Morris also explores the businesses behind coffee: the brokers, roasters, and machine manufacturers, and dissects the geopolitics linking producers to consumers. Written in a style as invigorating as that first cup of Java and featuring fantastic recipes, images, stories, and surprising facts, *Coffee* will fascinate foodies, food historians, baristas, and the many people who regard this ancient brew as a staple of modern life.

*The Fate of Food* Amanda Little, 2019-06-04 WINNER OF THE 2019 NAUTILUS BOOK AWARD In the fascinating story of the sustainable food revolution, an environmental journalist and professor asks the question: Is the future of food looking bleak or better than ever? In *The Fate of Food*, Amanda Little takes us on a tour of the future. The journey is scary, exciting, and ultimately encouraging. Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction*, climate models show that global crop production will decline every decade for the rest of this century due to drought, heat, and flooding. Water supplies are in jeopardy. Meanwhile, the world's population is expected to grow another 30 percent by midcentury. So how really will we feed nine billion people sustainably in the coming decades? Amanda Little, a professor at Vanderbilt University and an award-winning journalist, spent three years traveling through a dozen countries and as many U.S. states in search of answers to this question. Her journey took her from an apple orchard in Wisconsin to a remote control organic farm in Shanghai, from Norwegian fish farms to famine-stricken regions of Ethiopia. The race to reinvent the global food system is on, and the challenge is twofold: We must solve the existing problems of industrial agriculture while also preparing for the pressures ahead. Through her interviews and adventures with farmers, scientists, activists, and engineers, Little tells the fascinating story of human innovation and explores new and old approaches to food production while charting the growth of a movement that could redefine sustainable food on a grand scale. She meets small permaculture farmers and Big Food executives, botanists studying ancient superfoods, and Kenyan farmers growing the country's first GMO corn. She travels to places that might seem irrelevant to the future of food yet surprisingly play a critical role: a California sewage plant, a U.S. Army research lab, even the inside of a monsoon cloud above Mumbai. Little asks tough questions: Can GMOs actually be good for the environment, and for

us Are we facing the end of animal meat What will it take to eliminate harmful chemicals from farming How can a clean climate resilient food supply become accessible to all Throughout her journey Little finds and shares a deeper understanding of the threats of climate change and encounters a sense of awe and optimism about the lessons of our past and the scope of human ingenuity **Coffee: From the Field to the Cup** Paulo Mazzafera, Sara Adrián López de Andrade, Sarada
