Two Thousand Questions and Answers about the War ,1918 **Dead Drop** Ross05/ McKenrick,2008-05 **Mobile Learning and STEM** Helen Crompton,John Traxler,2015-12-07 In recent years there has been a renewed focus on STEM education in the United States fueled by evidence that young learners competencies in science technology engineering and mathematics are falling behind those of their global peers Scholars and practitioners are beginning to utilize the new pedagogical opportunities offered by mobile learning to improve the successes of teachers and K 12 students across STEM subjects **Mobile Learning and STEM Case Studies in Practice** is a comprehensive collection of case studies that explore

mobile learning's support of STEM subjects and that utilize mobile technology to facilitate unique and effective K-12 teaching and learning experiences. In addition to its focus on STEM achievement for researchers, this volume is a resource for teachers working to implement mobile learning initiatives into their classrooms. *Mobile Learning and STEM* also includes research that is applicable to classrooms in nations around the world where few students from underrepresented racial and socioeconomic backgrounds are entering into STEM jobs. Concluding with a summary of its research and its implications to future scholarship and practice, this book is a springboard for practitioners, specialists, higher education instructors, and researchers who want to establish better practices in schools and raise student achievement in STEM subjects.

Examining Response to Intervention (RTI) Models in Secondary Education Epler, Pam, 2015-07-25. Response to Intervention (RTI) is an intervention model designed to assist all students regardless of their academic ability. It seeks to assist students who are struggling in academics by providing them with targeted assistance in the form of tutoring, pull-out services, and differentiated classroom instruction. *Examining Response to Intervention (RTI) Models in Secondary Education* highlights the application of the RTI model to secondary schools through instructional strategies and real-world examples of how this model can be used at the middle and high school levels. Through a series of informative and timely chapters written by global educational specialists, this publication is ideally designed for use by middle and high school teachers and school administrators, as well as professors and students in upper-level Educational Leadership and Secondary Education programs.

Educational Recommender Systems and Technologies: Practices and Challenges Santos, Olga C., 2011-12-31.

Recommender systems have shown to be successful in many domains where information overload exists. This success has motivated research on how to deploy recommender systems in educational scenarios to facilitate access to a wide spectrum of information. Tackling open issues in their deployment is gaining importance as lifelong learning becomes a necessity of the current knowledge-based society. Although Educational Recommender Systems (ERS) share the same key objectives as recommenders for e-commerce applications, there are some particularities that should be considered before directly applying existing solutions from those applications. *Educational Recommender Systems and Technologies: Practices and Challenges* aims to provide a comprehensive review of the state of the art practices for ERS, as well as the challenges to achieve their actual deployment. Discussing such topics as the state of the art of ERS methodologies to develop ERS and architectures to support the recommendation process, this book covers researchers interested in recommendation strategies for educational scenarios and in evaluating the impact of recommendations in learning, as well as academics and practitioners in the area of technology-enhanced learning.

College Algebra: Graphs & Models John Coburn, J.D. (John) Herdlick, 2011. Three components contribute to a theme sustained throughout the Coburn Herdlick Series: that of laying a firm foundation, building a solid framework, and providing strong connections. In the *Graphs and Models* texts, the authors combine their depth of experience with the conversational style and the wealth of applications that the Coburn Herdlick texts have become known for. By

combining a graphical approach to problem solving with algebraic methods students learn how to relate their mathematical knowledge to the outside world The authors use technology to solve the more true to life equation

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework

for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching
