YU,2022 **Cybersecurity Public Policy** Bradley Fowler,Kennedy Maranga,2022-06-23 Since 2000 many governments parliaments and ministries have worked diligently to define effective guidelines that safeguard both public and private sector information systems as well as information assets from unwanted cyberattacks and unauthorized system intrusion While some countries manage successful cybersecurity public policies that undergo modification and revision annually other countries struggle to define such policies effectively because cybersecurity is not a priority within their country For countries that have begun to define cybersecurity public policy there remains a need to stay current with trends in cyber defense and information system security information not necessarily readily available for all countries This research evaluates 43 countries cybersecurity public policy utilizing a SWOT analysis Afghanistan Australia Bermuda Canada Chili Croatia Cyprus Czech Republic Dubai Egypt Estonia European Union Finland Gambia Germany Greece Hungary Iceland Ireland Italy Japan Kenya Kosovo Kuwait Luxemburg Malaysia Nepal Netherlands New Zealand Norway Poland Samoa Singapore Slovakia South Africa Sweden Switzerland Thailand Trinidad Uganda United Arab Emirates United Kingdom and Vietnam to transparently discuss the strengths weaknesses opportunities and threats encompassing each of these 43 countries cybersecurity public policies The primary vision for this title is to create an educational resource that benefits both the public and the private sectors Without clarity on cybersecurity public policy there remains a gap in understanding how to meet these needs worldwide Furthermore while more than 43 countries have already enacted cybersecurity public policy many countries neglect translating their policy into English this impacts the ability of all countries to communicate clearly and collaborate harmoniously on this subject matter This book works to fill the gap stop the spread of misinformation and
