Collins Bird Guide Stuart Keith, John Gooders, 1980 Bird watching is enjoying an ever increasing popularity That

appreciation is often accompanied by a desire to know more about them this book is designed to satisfy that wish and incidentally to be in itself a treasury of bird photographs This guide covers all of Europe including that part of Russia west of the 30th meridian Iceland is included as well as the larger Mediterranean islands and the part of Turkey lying west of the Bosphorus 464 bird species are fully described and illustrated in this guide As a rule we have included a species if it has occurred in Europe more than thirty times Because the illustrations in conventional bird guides are organised by families and scattered throughout the text the reader must leaf through the entire book to find the picture of a particular bird Instead we have placed all the colour plates in one section and then grouped the family and species descriptions in a separate section The unified visual key arranges birds by characteristics they have in common such as shape and colour Simple silhouette symbols direct the reader to the group of birds most resembling the one he has sighted He can then narrow his search to a few birds or find exactly the one he has seen Reading the species descriptions will confirm the identification For our illustrations we have used colour photographs of birds in their natural habitats Besides being a pleasure to look at these photographs show birds as they really are in nature rather than an artist's interpretation For the first time colour photographs of almost every European bird appear in one volume bringing together the work of over 100 outstanding bird photographers in a total of 613 photographs
