Ethics and the

Management of Computer Technology W. Michael Hoffman, Jennifer Mills Moore, 1982

A Gift of Fire Sara Baase, Timothy Henry, 2018 For courses in Computer Ethics and Computers and Society An objective study of technology ethics that inspires critical thinking and debate In Gift of Fire A Social Legal and Ethical Issues for Computing Technology Sara Baase presents a balanced exploration of the social legal philosophical ethical political constitutional and economic implications of computing and the controversies they raise With an objective computer scientist's perspective and with historical context for many issues Baase covers the issues readers will face both as members of a technological society and as professionals in computer related fields A primary goal is to develop computer professionals who understand the implications of what they create and how it fits into society at large This text encourages readers to think about the ethics and philosophical direction behind topics but doesn't lead students to conclusions The 5th Edition contains updated material on new topics and examples outdated material has been removed and several topics have been reorganized New material appears throughout including material on current trending topics such as drones and autonomous cars

Ethical and Social Issues in the Information Age Joseph M. Kizza, 2007-06-02 Since the publication of the first edition in 1997 there have been tremendous changes in the fields of computer science and information sciences During this period we have become more dependent than ever before on computer and telecommunication technology As we both individually and as nations become more dependent on cyberspace technology it has itself become a critical component of individual nation's security infrastructures that control power grids gas and oil storage facilities transportation and all forms of national communication including emergency services The recent rise in cyber attacks many of them with lightning speed affecting millions of computers worldwide and causing billions of dollars in losses both to individuals and businesses is an indication of how unprepared we are to handle such attacks not only today but also in the future Such attacks are a mark of the poor state of our cyberspace security policies The facts that there are no signs to indicate there is going to be a slowdown in such attacks and that nations are not doing anything worth calling preventive has heightened the need for an effective strategy to produce responsible professionals who can play an active role in the fight against computer and cyber attacks and vandalism
