Using Multivariate Statistics Barbara G. Tabachnick, Linda S. Fidell, 1983 *Turkish Education Studies* Ömer Tuğrul KARA, Serkan FURTUN, 2025-01-15 *International Research in Education Sciences IX* Filiz Arzu Yalın, 2024-05-01 This study titled *International Research in Educational Sciences IX* consists of 4 chapters. The topics of this valuable work which emerged with the outstanding efforts of a total of 5 researchers include discussion of the challenges posed by digital education, examination of studies on leadership, metacognitive reading strategies of university students, and examination of master's theses on foreign language teaching. *Longitudinal Structural Equation Modeling* Jason T. Newsom, 2023-10-31 *Longitudinal Structural Equation Modeling* is a comprehensive resource that reviews structural equation modeling (SEM) strategies for longitudinal data to help readers determine which modeling options are available for which hypotheses. This accessibly written book explores a range of models from basic to sophisticated, including the statistical and conceptual underpinnings that are the building blocks of the analyses. By exploring connections between models, it demonstrates how SEM is related to other longitudinal data techniques and shows when to choose one analysis over another. Newsom emphasizes concepts and practical guidance for applied research rather than focusing on mathematical proofs, and new terms are highlighted and defined in the glossary. Figures are included for every model along with detailed discussions of model specification and implementation issues, and each chapter also includes examples of each model type, descriptions of model extensions, comment sections that provide practical guidance and recommended readings. Expanded with new and updated material, this edition includes many recent developments, a new chapter on growth mixture modeling, and new examples. Ideal for graduate courses on longitudinal data analysis, advanced SEM, longitudinal SEM, and/or advanced data quantitative analysis taught in the behavioral, social, and health sciences, this new edition will continue to appeal to researchers in these fields. *Molecular Techniques in Food Biology* Aly Farag El Sheikha, Robert E. Levin, Jianping Xu, 2018-01-02 *Molecular Techniques in Food Biology: Safety, Biotechnology, Authenticity, Traceability* explores all aspects of microbe-food interactions, especially as they pertain to food safety. Traditional morphological, physiological, and biochemical techniques for the detection, differentiation, and identification of microorganisms have severe limitations. As an alternative, many of those responsible for monitoring food safety are turning to molecular tools for identifying foodborne microorganisms. This book reviews the latest molecular techniques for detecting, identifying, and tracing microorganisms in food, addressing both good foodborne microbes such as those used for fermentation and in probiotics, and harmful ones responsible for foodborne illness and food quality control problems. *Molecular Techniques in Food Biology: Safety, Biotechnology, Authenticity, Traceability* brings together contributions by leading international authorities in food biology from academia, industry, and government. Chapters cover food microbiology, food mycology, biochemistry, microbial ecology, food biotechnology, and bio-processing, food authenticity, food origin, traceability, and food science and technology.
