Veliov,Stefan Wrzaczek,2014-07-08 Dynamic game theory serves the purpose of including strategic interaction in decision making and is therefore often applied to economic problems This book presents the state of the art and directions for future research in dynamic game theory related to economics It was initiated by contributors to the 12th Viennese Workshop on Optimal Control Dynamic Games and Nonlinear Dynamics and combines a selection of papers from the workshop with invited papers of high quality     Advances in Dynamic Games and Applications Tamer Başar,Alain Haurie,1994 Recent years have witnessed a surge of activity in the field of dynamic both theory and applications Theoretical as well as practical games in problems in zero sum and nonzero sum games continuous time differential and discrete time multistage games and deterministic and stochastic games games are currently being investigated by researchers in diverse disciplines such as engineering mathematics biology economics management science and political

science This surge of interest has led to the formation of the International Society of Dynamic Games ISDG in 1990 whose primary goal is to foster the development of advanced research and applications in the field of game theory One important activity of the Society is to organize biannually an international symposium which aims at bringing together all those who contribute to the development of this active field of applied science In 1992 the symposium was organized in Grimentz Switzerland under the supervision of an international scientific committee and with the help of a local organizing committee based at University of Geneva This book which is the first volume in the new Series Annals of the International Society of Dynamic Games see the Preface to the Series is based on presentations made at this symposium It is however more than a book of proceedings for a conference Every paper published in this volume has passed through a very selective refereeing process as in an archival technical journal

**New Trends in Dynamic Games and Applications** Jan G. Olsder, 1995-12-01

The theory of dynamic games is very rich in nature and very much alive If the reader does not already agree with this statement I hope he she will surely do so after having consulted the contents of the current volume The activities which fall under the heading of dynamic games cannot easily be put into one scientific discipline On the theoretical side one deals with differential games difference games the underlying models are described by differential respectively difference equations and games based on Markov chains with deterministic and stochastic games zero sum and nonzero sum games two player and many player games all under various forms of equilibria On the practical side one sees applications to economics stimulated by the recent Nobel prize for economics which went to three prominent scientists in game theory biology management science and engineering The contents of this volume are primarily based on selected presentations made at the Sixth International Symposium on Dynamic Games and Applications held in St Jovite Quebec Canada 13-15 July 1994 Every paper that appears in this volume has passed through a stringent reviewing process as is the case with publications for archival technical journals This conference as well as its predecessor which was held in Grimentz 1992 took place under the auspices of the International Society of Dynamic Games ISDG established in 1990 One of the activities of the ISDG is the publication of these Annals The contributions in this volume have been grouped around five themes
