Short Answer Questions and MCQs in Anaesthesia and Intensive Care, 2Ed Peter Murphy, Adrian Dashfield, 2004-08-27 Following on from the success of the first edition Short Answer Questions and MCQs in Anaesthesia and Intensive Care has been completely rewritten to reflect the changes to the final FRCA exam from a long essay based examination to compulsory short answer questions SAQs This guide aims to introduce methods and systems of answering questions succinctly and accurately Almost all of the questions have been asked in the final FRCA since 1996 and most chapters carry more detail than required to reach a pass standard The new edition takes a question orientated approach and provides guidance for the final exam Given the short time allowed for answering the SAQs previous practice prior to sitting the examination is essential Each of the twelve sections has a comprehensive set of multiple choice questions MCQ to the same standard as those set by the Royal College of Anaesthetists It is vital that candidates practice MCQs as well as SAQs and the ninety multiple choice questions that follow the SAQ paper carry just as much weight as the SAQ paper The book has been structured as topic based sections and chapters each of which can be followed and used to enable self testing This book is an invaluable revision aid during preparation for the final FRCA exam and due to the breadth of content also forms a useful ready reference throughout anaesthetic training **600 MCQs in Anaesthesia** Peter J. Anesthesiology Thomas J. DeKornfeld, Michael D. Detmer, 1980 *MCQ Tutor in Anaesthesia* Colin A. Pinnock, Robert M. Haden, 1993 These multiple choice questions should be a valuable preparation aid for candidates sitting the Part 2 and 3 FCA examination The questions have been collected over a number of years from actual exam papers and discursive answers prepared for them The format and style of the questions should prove of particular use to candidates who wish to assess their level of knowledge in pharmacology and physiology and wish to attempt mock exams in preparation for the real thing Each answer has been referenced and every effort has been made to use standard texts This should enable the reader to feel confident in the validity of the answers

*MCQ Selftest Companion to Lee's Synopsis of Anaesthesia* G. B. Rushman, N. J. H. Davies, 1995 This companion volume to Lee s Synopsis of Anaesthesia has been developed to enable the reader to check how much of the factual information from the Synopsis has been retained This does not of course cover the whole area of anaesthesia contained in the Synopsis which includes much about the art of the subject and the wisdom of many years of experience both of which are difficult to test Nevertheless the area of anaesthesia rests firmly on a database of scientific knowledge Such background knowledge is most easily tested by the MCQ format presented here The questions have been carefully formatted in a friendly way to help develop the reader s knowledge of the subject and are therefore slightly different from exam questions They are designed to augment what you have gleaned from the Synopsis rather than to test in a destructive or competitive sense This little book is unashamedly dedicated to improving the quality of anaesthesia It is also dedicated to helping students of anaesthesia pass exams which has been the long term aim of the Synopsis itself On each question there is the briefest reference to the page of the Synopsis to which the question refers After each question a brief explanation of the reason for a statement being false is frequently included The answers on the right hand side of the page may be covered up by a card or ruler while the statement is assessed and then checked against the reader s views
