**Exploring the Mind of Ancient Man** Pedarapu Chenna Reddy,2007

This book offers a major collection of invited papers assembled for the specific occasion of the 60th birthday of Australian researcher Robert G Bednarik Its widely ranging topics reflect the equally wide ranging interests of this most productive scholar but they are all somehow arranged around his primary focus the mind of ancient man how he came to be human and what kinds of scientific methodology might be brought to bear on the ambitious task of exploring these subjects A large number of Indian and international scholars representing most continents address the broad spectrum of Bednarik's interests and acquaint the reader with many of the specific problems and issues surrounding questions of the origins of culture of human realities and the evolution of human cognition One of the most distinctive common threads in this volume is its preoccupation with prehistoric rock art reflected in the majority of the contributions which also reflect the emphasis of Bednarik's continuing life work

*Annual Review of Genomics and Human Genetics* ,2002 The contributors to this volume of 16 articles are academics in biophysics biology medicine and genetics in the US and the UK The initial article by Mary F Lyon of Oxford U gives a personal history of research on the mouse genome over the last 50 years The remaining articles consist of case studies on topics that include human migration and population databases and tools for browsing genomes protein structure molecular mechanisms for genomic disorders modular medical models and issues over the patenting of genes
