Berger, 1998-01-30 Successful theatrical productions are a team effort and require the close cooperation of the playwright producer director designers and actors The group responsible for selecting a play and the style of its production must first reach a consensus on their reason for being and their rationale for approaching an audience The goals and modes of production are constantly evolving requiring theatre personnel to be constantly conversant with shifts in the functions of members of theatre teams in forms and styles of drama and in techniques of staging This book stresses the need for collaboration and communication among the members of the theatre team during the moving of a script toward its audience Though evolution in the roles of producer playwright and director has been neither uniform nor evenly paced this book demonstrates that change itself provides theatre teams openings for inspiration and creation Through examples of production successes and failures of eminent plays since mid century and through discussions of specific interaction or lack of it among those who produced and directed the plays this volume stresses clearly delegated authority and responsibility of production roles Full scale interaction is vital as the members of the theatre team interpret rehearse and perform a play This book also includes sections on the different production circumstances encountered by theatre teams of various levels and excerpts from interviews with theatre professionals Dramatists Sourcebook Theatre Communications Group, 2004-09 Now in its 23rd edition *Dramatists Sourcebook* the best selling guide for opportunities for stage writers is completely revised
