But as the war progressed the Germans recognizing the offensive capability of armored warfare developed an impressive range of anti tank warfare weaponry and munitions. Using many rare unpublished images this *Images of War* book covers the full Nazi anti armor capability from the 3.7cm Pak 35, 5cm Pak 38 and 7.5cm Pak 40 to the versatile 8.8cm Flak feared by the Allies. Also featured are the half tracks and converted Panzers that pulled or mounted these weapons and carried forward observers and reconnaissance elements. Later hand held anti tank weapons came into service and were effective and economic against Allied armor. The Panzerfaust with its shaped charge warhead became the first disposable anti tank weapon in history. This comprehensive book shows this formidable range of weapons in action from Poland in 1939 through North Africa and the Eastern Front to the final collapse in 1945.

*US Anti-tank Artillery 1941-45* Steven J. Zaloga, 2012-08-20 The US Army developed the 37mm anti tank gun in response to needs identified during the Spanish Civil War. By the time it entered service in Tunisia in 1943 the gun was already obsolete. This compact guide explores the US manufacture of anti tank artillery over the changing course of the Second World War. They next began developing licensed manufacture of the British 6 pdr in the hope of finding a quick solution to its artillery requirements. This in turn proved unequal to the demands of warfare in France in 1944 and further anti tank measures were developed: rocket propelled grenades for infantry use and weapons designed specifically for use by the Tank Destroyer Force.
