**Fundamentals of Gifted Education** Carolyn M. Callahan, Holly L. Hertberg-Davis, 2013 The field of gifted education is characterized by a confusing array of perspectives concerning such fundamental issues as definition philosophy curriculum social and emotional development and underserved populations The mission of this book is to provide a coherent framework that instructors and service providers can use in planning effective programs providing appropriate counseling services and evaluating programs for the gifted Most sections are organized around fundamental issues confronting the field and follow a common structure an introductory chapter that provides historical and theoretical background and organizing questions followed by several point of view chapters written by experts that provide varied perspectives on the topic at hand Distinguishing Features Comprehensive Coverage The book's forty five manageable length chapters cover the full range of topics that must be considered in planning programs and services for gifted students both within and outside of school Coherent Structure

Section introductions provide background information and organizing questions to guide chapter authors who provide varying views of the issue at hand. The emphasis is not on the right way or the wrong way except when clearly documented bad practice is discussed but on how best practice stems from well informed and logical decision making. Decision Making Focus: The book's introductory chapter addresses the need for a clearly developed and consistently applied set of values to guide decision making. Likewise each section introduction includes a decision making framework regarding some aspect of educating, counseling or parenting gifted students.
