

INTRODUCTION TO CODING THEORY

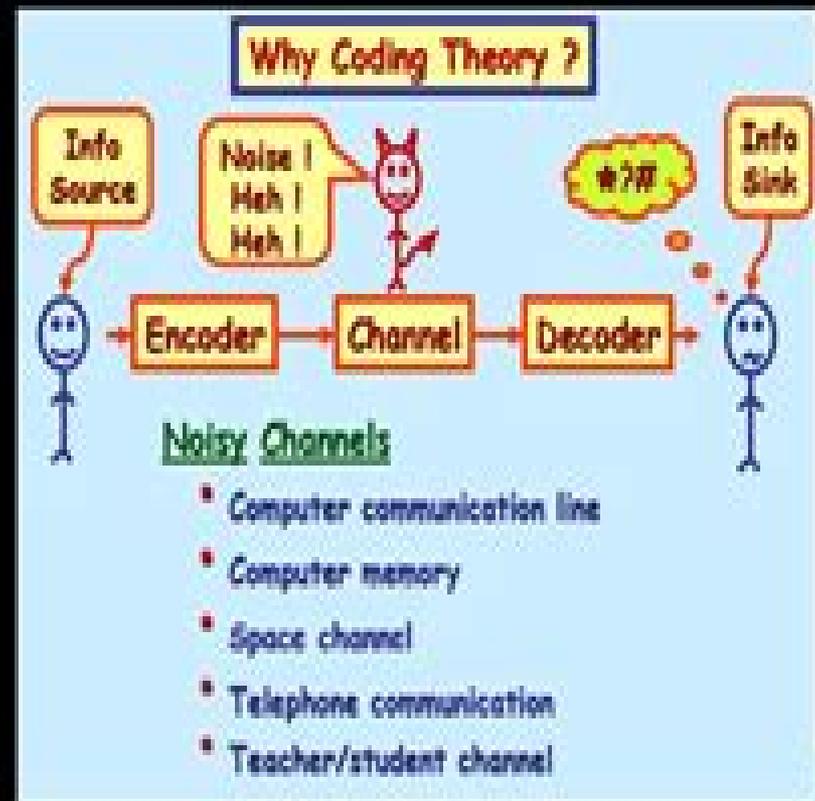

All communication involves three basic steps:

- Encoding a message at its source.
- Transmitting that message through a communication medium.
- Decoding the message at its destination.

Coding theory - theory of error correcting codes - attempts to minimize data loss due to errors introduced in transmission from noise, interference or other forces.

Binary Code: A code C that is formed only by using the numbers 0 and 1.

Examples of codes: $C_1 = \{00, 01, 10, 11\}$
 $C_2 = \{000, 010, 101, 100\}$
 $C_3 = \{00000, 01101, 10111, 11011\}$

Source Coding Theory Robert M. Gray, 1989-10-31 Source coding theory has as its goal the characterization of the optimal performance achievable in idealized communication systems which must code an information source for transmission over a digital communication or storage channel for transmission to a user The user must decode the information into a form that is a good approximation to the original A code is optimal within some class if it achieves the best possible fidelity given whatever constraints are imposed on the code by the available channel In theory the primary constraint imposed on a code by the channel is its rate or resolution the number of bits per second or per input symbol that it can transmit from sender to receiver In the real world complexity may be as important as rate The origins and the basic form of much of the theory date from Shannon's classical development of noiseless source coding and source coding subject to a fidelity criterion also called rate distortion theory 73-74 Shannon combined a probabilistic notion of information with limit theorems from ergodic theory and a random coding technique to describe the optimal performance of systems with a constrained rate but with unconstrained complexity and delay An alternative approach called asymptotic or high rate quantization theory based on different techniques and approximations was introduced by Bennett at approximately the same time 4 This approach constrained the delay but allowed the rate to grow large
