vendors and users both from academia and from industry Unlike previous symposia in the series FM 2003 was not given a specific theme Rather its main goal could be synthesized as widening the scope Indeed the organizers aimed at enlarging the audience and impact of the symposium along several directions Dropping the suffix E from the title of the conference reflects the wish to welcome participation and contribution from every country also contributions from outside the traditional Formal Methods community were solicited The recent innovation of including an Industrial Day as an important part of the symposium shows the strong commitment to involve industrial people more and more within the Formal Methods community Even the traditional and rather fuzzy borderline between software engineering formal methods and methods and formalisms exploited in different fields of engineering was so what challenged *Software Engineering* Roger S.
