

**DBQ 9: Imperialism in Africa**

(Adapted from *Document-Based Assessment for Global History*, Walch Education)

**Historical Context:**

European imperialism in the late nineteenth and twentieth centuries resulted in the carving up of areas of Africa and Asia into vast colonial empires. This was true for most of the continent of Africa. As imperialism spread, the colonizer and the colony viewed imperialism differently. They saw both positive and negative effects of imperialism.

- **Directions:** The following question is based on the accompanying documents in Part A. As you analyze the documents, take into account both the source of the document and the author's point of view. Be sure to:
  1. Carefully read the document-based question. Consider what you already know about this topic. How would you answer the question if you had no documents to examine?
  2. Now, read each document carefully, underlining key phrases and words that address the document-based question. You may also wish to use the margin to make brief notes. Answer the questions which follow each document.
  3. Based on your own knowledge and on the information found in the documents, formulate a thesis that directly answers the question.
  4. Organize supportive and relevant information into a brief outline.
  5. Write a well-organized essay proving your thesis. The essay should be logically presented and should include information both from the documents and from your own knowledge outside of the documents.

**Question:** Evaluate the new imperialism of the late nineteenth and early twentieth centuries in Africa. What were the positive and negative effects of imperialism for the colonizer and the colony?

**Part A:** The following documents provide information about the effects of imperialism on Africa. Examine the documents carefully, and answer the questions that follow.

**Document 1**

This excerpt is adapted from *Imperialism* by J.A. Hobson, a British scholar.

The period of imperialism has witnessed many wars. Most of these wars have been caused by attacks of white races upon so-called "lower races." They have resulted in the taking of territory by force. . . . The white rulers of the colonies live at the expense of the natives. Their chief work is to organize labor for their support. In the typical colony, the most fertile lands and the mineral resources are owned by white foreigners. These holdings are worked by natives under their direction. The foreigners take wealth out of the country. All the hard work is done by natives.

What negative aspects of imperialism does this British scholar point out? \_\_\_\_\_
