## Question 3:

(i) What is biodiversity? Why is biodiversity important for human lives?

Answer:

The variety of flora and fauna in a given geographical area is called biodiversity of that area. Each species on this earth lives in a system of interdependencies on various biotic and abiotic factors. Human beings also depend on several biotic and abiotic factors for their survival. We may be directly taking some resources from certain species, but we indirectly depend on many other species. Hence, biodiversity is important for human lives.

(ii) How have human activities affected the depletion of flora and fauna? Explain.

Answer:

Various human activities have resulted in a decline of forest cover. Vast tracts of forest had been cleared to make way for farmland and for making new houses, factories and infrastructure. Mining is another human activity which has destroyed forest in a vast area. Thus, human activities have resulted in significant depletion of flora and fauna.
