The work analyses the intellectual foundations, the evolution and different interpretations, strengths and potential of the link between environment and security but also its weaknesses, incoherencies and distortions. To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene. Furthermore, the book examines the practice, theory, divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors. It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations, the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date. The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities. This book will be of great interest to students and academic scholars of Environmental Security, Critical Security Studies, Green Political Theory, Global Governance and International Relations in general.
