Contribution Of Muslim Scientists To The World:

Muslim Contributions to World Civilization M. Basheer Ahmed, MD and Ambassador Syed A. Ahsani and Dilnawaz A. Siddiqui, PhD, 2005-01-01 Islam's brilliant contributions to science, art and culture are a timeless and precious heritage which should be historically preserved for future generations. The great achievements of Muslim scholars are rarely, if at all, acknowledged in formal education and today their identity, origins and impact remain largely obscure. This collection of papers aims to give readers a brief introduction to the intellectual history of Muslims and the contributions that eminent Muslim scholars have made in certain specific fields of knowledge including basic and applied physical and biological sciences, medicine, legal and political theories and practices, economic and financial concepts, models and institutions etc. The preservation of civilization necessitates a better understanding, sharing and recognition of our common human heritage. Given today's widespread negative stereotyping and falsely generated misunderstanding of Islam and Muslims, the publication of these papers on Muslim Contributions to World Civilization is vital to help repair the wrong that is being perpetrated and restore the historical truth which is being distorted.

SCIENTIFIC RESEARCH AND DISCOVERIES BASED ON THE UNDERSTANDING OF QUR'AN AND UNIVERSE (IIIT) IMAD FAKHRI, TAHA ALSHAIKHLI, ROSLINA OTHMAN, NOOR AZURA ZAKARIA, 2023-06-13 This book revisits that legacy and reclaims the Qur'an as a dynamic source of inquiry, not merely a book of moral precepts but a text rich with epistemological directives. It begins with a discussion on the nature of scientific research and discovery, drawing from contemporary definitions and methodologies. The first chapter provides an overview of scientific investigation as a structured, systematic process that involves formulating questions, collecting data and constructing explanations through reasoned analysis. It highlights different research types: observational, experimental, descriptive, analytical and cross-sectional, and explores their relevance in the context of Qur'an-inspired scientific thinking.
