Creativity in the Early Years

What is Creativity?

Creativity is about children's ability to invent something new, whether it's figuring out a solution to a problem, finding a new way of doing things or making an object. There are just a few ways to be creative.

Why is it important?

Creativity enables children to fully explore and understand the world around them, helping them to process their experiences and use their imagination to invent and discover new possibilities.

Staying Creative

Once children are born, how they react and respond to different stimuli is considered 'creative'. However, as children grow older, creativity can be lost.

It's crucial that as practitioners, we make sure creativity is a priority in the early years and help cement children's intrinsic desire to learn. We can help to do this by creating a supportive environment that invests in 'possibility thinking' and builds on the 'what if...?' philosophy.

Developing a Creative Environment

To develop a creative environment, consider what opportunities children have for exploration.

Providing an environment which has elements of challenge, curiosity problem-

Kennedy,2022-06-16

This edited book provides an overview of unstructured and structured play scenarios crucial to developing young children's awareness, interest, and ability to learn Science, Technology, Engineering, and Mathematics (STEM) in informal and formal education environments. The key elements for developing future STEM capital, enabling children to use their intuitive, critical thinking, and problem-solving abilities and promoting active citizenship and a scientifically literate workforce, begins in the early years as children learn through play, employing trial and error and often investigating on their own. Forty-seven STEM experts come together from 16 countries: Argentina, Australia, Belgium, Canada, England, Finland, Germany, Israel, Jamaica, Japan, Malta, Mauritius, Mexico, Russia, Sweden, and the USA, and describe educational policies and experiences related to young learners (3-4 years of age) as well as students attending formal nursery school, early primary school, and the early years classes (post-5 years of age). The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups; citizen scientists seeking guidance to provide children with quality educational activities; daycare practitioners providing educational structures for young children from birth to formal education; primary school teachers and preservice teachers seeking to teach preschool kindergarten or children typically aged 5-8 years old in grades 1-3; as well as researchers and policy makers working in science didactics with small children.

Implementing Quality Improvement & Change in the Early Years Michael Reed, Natalie Canning, 2011-11-04 For all those working in Early Years, improving quality experiences for all young children is a priority. By examining issues surrounding quality improvement, the importance of reflective practice, and the attributes required in the workplace to effect change and leadership, this book provides a contemporary view of practice. Chapters focus on how settings can improve quality experiences for young children and how to implement strategies that lead to quality improvement. Issues covered include multi-disciplinary working, evaluating impact through reflective practice, creativity, digital technologies, and play safeguarding young children, leading practice and leading change, working with parents, improving the quality of student experience. This text allows students and practitioners to examine and reflect on practices that lead to creative Quality Improvement Strategies (QIS) in Early Years settings. Michael Reed is a Senior Lecturer at the University of Worcester, Institute of Education Centre for Early Childhood. Natalie Canning is a Lecturer in Early Years at The Open University.

Promoting Physical Development and Activity in Early Childhood Jackie Musgrave, Jane Dorrian, Joanne Josephidou, Ben Langdown, Lucy Rodriguez Leon, 2024-04-11 Getting young children active and supporting their physical development right from the start is essential for children's all-round development and good health. However, children's levels of physical activity are declining. This book helps readers increase their understanding to support young children's overall development, health, and wellbeing. Breaking current physical activity guidelines into bite-size chunks, the book provides key advice on caring for and educating babies and young children on how to meet the recommended amount of physical activity each day. Current research is accessibly explored, including links with screen time and neuroscience, and informs a range of flexible, open-ended activities and practical strategies to use in every early years setting.

setting Chapters include Suggestions on planning an enabling environment to support young children's physical development without expensive equipment or classes Steps for making physical activity inclusive for all children including those with special educational needs and physical conditions Key research translated into easy to understand informative guidance The voice of the child and the importance of listening to children woven throughout Opportunities for readers to assess how their own setting supports physical activity The importance of early physical development to communication and future academic performance Grounded in best practice for supporting physical development in the early years and working with parents this book is essential reading for trainee and practising early years educators as well as parents and carers of young children
