Design Manual for Bicycle Traffic Rik de Groot,2007 Cycling Cultures Peter Cox,2015-05-27 Cycling studies is a rapidly growing area of investigation across the social sciences reflecting and engaged with rapid transformations of urban mobility and concerns for sustainability This volume brings together a range of studies of cycling and cyclists examining some of the diversity of practices and their representation Its international contributors focus on cases studies in the UK and the Netherlands and on cycling subcultures that cross national boundaries By considering cycling through the lens of culture it addresses issues of diversity and complexity both past and present The authors cross the boundaries of academia and professional engagement linking theory and practice to shed light on the very real processes of change that are reshaping our mobility

Cycling and Sustainability John Parkin,2012-05-18 Explores the reasons for difficulties in making cycling mainstream in many cultures despite its claims for being one of the most sustainable forms of transport This title examines the cultural development of cycling in countries with high use and the differences in use between different sub groups of the population

Integrated Transport Moshe Givoni,David Banister,2010-07-02 Travel is an essential part of everyday life and today most journeys are multimodal It is the total travel experience that counts and integrated transport must reduce the inconvenience of transfers between modes Most research and many publications on transport policy advocate sustainable transport but the priority given to integration has been negligible Yet integration is one of the most important means to advance sustainable transport and sustainability more generally While integrated transport systems are seen to be an ideal there is a failure to make the transition from policy to practice The authors argue that the achievement of sustainable transport is still a dream as an integrated transport policy is a prerequisite for a sustainable transport system It is only when the two concepts of sustainability and integration operate in the same direction and in a positive way that real progress can be made In this book transportation experts from across the world have addressed the questions about what is integration why is it so important and why is it so hard to achieve The book provides an in depth analysis of these issues and it aims to provide a better understanding of the subject about what should be strived for about what is realistic to expect and about how to move forward towards a more integrated provision of transport infrastructure services and management

Cyclist safety ,2020-10-15 Cyclist safety an information resource for decision makers and practitioners describes the magnitude of cyclist death and injury the key risk factors and effective interventions The document stresses the importance of a comprehensive holistic approach that includes legislation enforcement and behavioural measures specifically for cyclists design of the built environment as well as integrating cyclist safety into overall road safety and transport strategies It also draws attention to the benefits of cycling which should be promoted as an important mode of transport given its potential to improve health and preserve the environment

Sustainable Transportation Planning Jeffrey Tumlin,2012-01-24 The Great American Dream of cruising down the parkway zipping from here to there at any time has given way to a true

nightmare that is destroying the environment costing billions and deeply impacting our personal well being Getting from A to B has never been more difficult expensive or miserable It doesn't have to be this way Jeffrey Tumlin's book Sustainable Transportation Planning offers easy to understand clearly explained tips and techniques that will allow us to quite literally take back our roads Essential reading for anyone who wants to drive our transportation system out of the gridlock Marianne Cusato home designer and author of Get Your House Right Architectural Elements to Use and Avoid The book is full of useful ideas on nearly every page Bill DiBenedetto of Triple Pundit As transportation related disciplines of urban planning architecture landscape architecture urban economics and social policy have undergone major internal reform efforts in recent decades Written in clear easy to follow language this book provides planning practitioners with the tools they need to achieve their cities economic development social equity and ecological sustainability goals Starting with detailed advice for improving each mode of transportation the book offers guidance on balancing the needs of each mode against each other whether on a downtown street or a small town neighborhood or a regional network Road & Transport Research ,1998

Behavioral Models and Characteristics of Bicycle-automobile Mixed-traffic Dean Brantley Taylor,Hani S. Mahmassani,1998 This report addresses an important need for fundamental understanding of bicycle automobile mixed traffic It presents models of 1 gap acceptance behavior and 2 bicyclist behavior at the onset of a yellow traffic signal indication in addition to analysis of 3 coordinating traffic signals to provide progression for both bicycles and automobiles Fundamental insights into mixed traffic behavior are derived and applied to selected problems in mixed traffic engineering and operations Discrete choice probit models are developed for both motorist and cyclist gap acceptance behavior An important fundamental insight from these models is that both cyclists and motorists require a longer gap when the gap is closed by a large vehicle e.g bus and both will accept a shorter gap when the gap is closed by a bicycle relative to a gap closed by a passenger car A methodology for determining an adequate clearance interval for bicycles is developed from a deterministic model based on kinematic relations The bicyclists behavior at the onset of a yellow signal indication are obtained Finally a conceptual foundation consisting of three primary contributions is developed for analyzing bicycle automobile mixed traffic progression along signalized streets Cycle-friendly Infrastructure ,1996 Making the Business Case for Translating Non-English Transportation Information ,2003 This digest summarizes the results of NCHRP Project 20 48 01 and is based on a study conducted by Dr John B Metcalf The objectives of the study were to assess describe and quantify to the greatest extent possible the need for the U S transportation community to improve access to non English published information *Research Results Digest - National Cooperative Highway Research Program* National Cooperative Highway Research Program,2003 **Research Results Digest** ,2003 *Traffic Engineering & Control* ,1993

Pianificare le reti ciclabili territoriali Michele Zazzi,Maurizio Tira,2012-04-17T00:00:00+02:00 Il presente volume si pone l'obiettivo di individuare un supporto metodologico aggiornato per la redazione degli strumenti di pianificazione inerenti alla

mobilit  lenta territoriale con particolare attenzione agli adempimenti richiesti dalla redazione del piano della rete degli itinerari ciclabili previsto dal D M 557 1999 Regolamento recante norme per la definizione delle caratteristiche tecniche delle piste ciclabili
