Book 4 A different angle a different twist to the elaborate uses of blockchain technology you should know more about

Added to the previous books I've written I felt inspired to increase your expertise in this particular area and share my knowledge with the world

In this guide you can learn about Ethereum and the connection to the Decentralized Consensus Network

The basics of DAPP Javascript API specifics related to blockchain technology

Methods to contract storage Alethzero and other software specifics

Coding typing and data values you need to understand

Transactions pulling data and structuring

The Blockchain Developer Elad Elrom, 2019-07-23

Become a Blockchain developer and design build publish test maintain and secure scalable decentralized Blockchain projects using Bitcoin Ethereum NEO EOS and Hyperledger

This book helps you understand Blockchain beyond development and crypto to better harness its power and capability

You will learn tips to start your own project and best practices for testing security and even compliance

Immerse yourself in this technology and review key topics such as cryptoeconomics coding your own Blockchain P2P network different consensus mechanisms decentralized ledger mining wallets blocks and transactions

Additionally this book provides you with hands on practical tools and examples for creating smart contracts and dApps for different blockchains such as Ethereum NEO EOS and Hyperledger

Aided by practical real world coding examples you'll see how to build dApps with Angular utilizing typescript from start to finish

connect to the blockchain network locally on a test network and publish on the production mainnet environment

Don't be left out of the next technology revolution become a Blockchain developer using *The Blockchain Developer* today

What You'll Learn

Explore the Blockchain ecosystem is and the different consensus mechanisms

Create miners wallets transactions distributed networks and DApps

Review the main features of Bitcoin Ethereum NEO and EOS and Hyperledger

are Interact with popular node clients as well as implementing your own Blockchain

Publish and test your projects for security and scalability

Who This Book Is For

Developers architects and engineers who are interested in learning about Blockchain or implementing Blockchain into a new greenfield project or integrating Blockchain into a brownfield project

Technical entrepreneurs technical investors or even executives who want to better understand Blockchain technology and its potential

[Blockchain by Example](#) Bellaj Badr, Richard Horrocks, Xun (Brian) Wu, 2018-11-30

Book Description

The Blockchain is a revolution promising a new world without middlemen

Technically it is an immutable and tamper proof distributed ledger of all transactions across a peer to peer network

With this book you will get to grips with the blockchain ecosystem to build real world projects

This book will walk you through the process of building multiple blockchain projects with different complexity levels and hurdles

Each project will teach you just enough about the field's leading technologies Bitcoin Ethereum Quorum and Hyperledger in order to be productive from the outset

As you make your way through the chapters you will cover the

major challenges that are associated with blockchain ecosystems such as scalability integration and distributed file management In the concluding chapters you ll learn to build blockchain projects for business run your ICO and even create your own cryptocurrency Blockchain by Example also covers a range of projects such as Bitcoin payment systems supply chains on Hyperledger and developing a Tontine Bank Every is using Ethereum By the end of this book you will not only be able to tackle common issues in the blockchain ecosystem but also design and build reliable and scalable distributed systems What you will learn Grasp decentralized technology fundamentals to master blockchain principles Build blockchain projects on Bitcoin Ethereum and Hyperledger Create your currency and a payment application using Bitcoin Implement decentralized apps and supply chain systems using Hyperledger Write smart contracts run your ICO and build a Tontine decentralized app using Ethereum Implement distributed file management with blockchain Integrate blockchain into existing systems in your organization Who this book is for If you are keen on learning how to build your own blockchain decentralized applications from scratch then this book is for you It explains all the basic concepts required to develop intermediate projects and will teach you to implement the building blocks of a blockchain ecosystem
