Virtual Reality Technology Demos for an Experimental Computer Science Course Cody James Jackson,2017 Virtual Reality VR technology has become relatively inexpensive and accessible for consumers in recent years In this project many small technical demonstrations of key VR concepts are presented These concepts and their supporting tech demos can be taught in a standalone computer science course or integrated into an existing game development computer graphics course to help the next generation of VR content creators get started in the field To encourage students to develop a holistic view of VR technology the technical demos are divided into two main groups the first of which emphasizes low level technical concepts and the second of which emphasizes high level design concepts These technical demos were created using the native Android OpenGL ES SDK for Google Cardboard the Unity SDK for Google Cardboard and the Unity SDK for OSVR

Virtual Reality on the Web Jonathan Tinney,2017 Consumer grade virtual reality VR headsets have led to a rise in the popularity of VR development Game engines such as Unity and Unreal Engine have developed Application Programming Interfaces API for rendering content to VR headsets allowing for the mass production of desktop ready VR experiences The release of the Cardboard platform for Android and iOS devices has allowed the mobile market to begin offering mobile VR games and applications albeit with less content due to limitations of the hardware The limitations present in mobile devices have stymied development of VR games for phones and tablets Little has been done in the way of creating a unified VR platform for desktop and mobile devices for this reason Through the use of the emerging technologies of WebVR and WebGL 2 0 The Mobile Virtual Reality Engine MVRE has been developed to confirm that a game engine can be built that provides a

satisfactory VR experience on both desktop and mobile devices This report demonstrates limitations of developing a single threaded game engine for the web and how the emerging web standard of WebGL Workers will eventually alleviate performance constraints on rendering Future works projects are provided that can be used to extend the functionality of the engine that has been developed
