Chatbot Development Tools For Startups 84 836 Chatbot Development Trends:

Microsoft Conversational AI Platform for Developers Stephan Bisser, 2021 Build a chatbot using the Microsoft Conversational AI platform This book will teach you step by step how to save time and money by including chatbots in your enterprise strategy You will learn how to be proficient at every phase of development from collaboration on a chatbot in an end to end scenario to the first mock up phase and on through to the deployment and evaluation phases Microsoft built a cloud service ecosystem for running artificial intelligence workloads in public cloud scenarios and a robust AI platform that offers a broad range of services targeting conversational artificial intelligence solutions such as chatbots Building a chatbot requires not just developer coding skills but special considerations including input from business stakeholders such as domain matter experts and power users You will learn by example how to use a great set of tools and services to bridge the gap between business and engineering You will learn how to successfully morph business requirements into actionable IT and engineering requirements You will learn about Bot Framework Composer which allows power users to initiate the building of a chatbot that can then be handed over to the development team to add capabilities through code Coverage is given to the process of sharing implementation tasks and workloads between power users who are using a low code or no code approach and developers who are building out the enhanced features for the chatbot What You Will Learn Understand Microsoft's comprehensive AI ecosystem and its services and solutions Recognize which solutions and services should be applied in each business scenario Discover no code low code approaches for building chatbots Develop chatbots using the conversational AI stack Align business and development for improved chatbot outcomes and reduced time to market This book is for developers and power users who want to build chatbots An understanding of the core principles of writing code NET or JavaScript for modern web applications is expected Stephan Bisser is a technical lead at Solvion and a Microsoft MVP for artificial intelligence In his current role he focuses on conversational AI Microsoft 365 and Azure He is passionate about the conversational AI platform and the cognitive services ecosystem Stephan and several other MVPs founded BotBuilderCommunity and SelectedTech community initiatives that focus on bot framework SDKs tools and tech topics related to Microsoft 365 and AI

AI Chatbot Development Agency M K Arman, 2026-01-24 Have you ever felt that everyone is talking about AI yet no one is clearly showing you how to turn it into real consistent income You see chatbots everywhere businesses experimenting with AI tools and agencies claiming AI solutions but deep down you know most of it is noise You don't want to play with AI You want to build something valuable useful and profitable That's exactly why AI Chatbot Development Agency exists This book is not about hype buzzwords or vague promises It is a clear practical step by step blueprint for building domain specific AI chatbots that businesses actually need and are happy to pay for If you've ever wanted to start an AI automation agency offer high value services or position yourself as a trusted AI expert instead of just another developer this book shows you how Most AI books teach tools This book teaches thinking positioning and outcomes

Businesses don't want a chatbot. They want fewer support tickets, faster sales, smoother HR operations, and lower costs. This book trains you to think like an AI consultant and agency builder, not a coder stuck solving the wrong problems. You'll learn how to translate real business pain into AI-powered solutions that feel like digital employees, not gimmicks. And here's the opportunity most people are missing: Domain-specific AI bots are the next goldmine. While everyone else is building generic bots, you'll know how to design solutions for customer service, HR, real estate, healthcare, and any industry with clarity, confidence, and credibility. This isn't just a book you read; it's a future you step into. By the end, you won't just understand AI; you'll know how to design chatbots that feel human, helpful, and trustworthy. Build real-world AI systems without getting overwhelmed by tech. Package AI services in a way clients instantly understand and want. Price confidently, close deals, and scale like a real agency. Position yourself as an authority someone businesses listen to. You're not buying chapters; you're buying clarity, confidence, and a repeatable business model. Right now, businesses are confused about AI, but they know they need it. That gap creates massive opportunity for people who can explain, design, and deliver practical AI solutions. If you don't step into that role, someone else will. This book saves you years of trial and error, insecurity, and underpricing yourself. It gives you a proven way to move from "I'm learning AI" to "I run an AI automation agency that solves real problems." Why should readers choose this book? Because it respects your intelligence. Because it speaks your language. Because it doesn't try to impress; it tries to transform. It's written to make you feel capable, empowered, and ahead of the curve. Not overwhelmed. Not confused. Not dependent on luck. If you're motivated by freedom, relevance, impact, and income, and you want a skillset that will still matter years from now, this book was written for you. You don't just buy this book; you invest in becoming someone who understands where AI is going and knows exactly how to profit from it. And once you see that future clearly, buying this book becomes a no-brainer.
