A Reliability Based Multidisciplinary Design Optimization:

Multidisciplinary Design Optimization and Its Application in Deep Manned Submersible Design Binbin Pan, Weicheng Cui, 2020-08-28 This book investigates Reliability based Multidisciplinary Design Optimization RBMDO theory and its application in the design of deep manned submersibles DMSs Multidisciplinary Design Optimization MDO is an effective design method for large engineering systems like aircraft warships and satellites which require designers and engineers from various disciplines to cooperate with each other MDO can be used to handle the conflicts that arise between these disciplines and focuses on the optimal design of the system as a whole However it can also push designs to the brink of failure In order to keep the system balanced Reliability based Design RBD must be incorporated into MDO Consequently new algorithms and methods have to be developed for RBMDO theory This book provides an essential overview of MDO RBD and RBMDO and subsequently introduces key algorithms and methods by means of case analyses In closing it introduces readers to the design of DMSs and applies RBMDO methods to the design of the manned hull and the general concept design The book is intended for all students and researchers who are interested in system design theory and for engineers working on large complex engineering systems

Sequential Optimization and Reliability Assessment for Multidisciplinary Systems Design Harish Beeram, 2005 Motivated by the need of high reliability and safety in complex engineering systems recently reliability based design has been increasingly applied in multidisciplinary design optimization MDO However a direct integration of reliability based design that has been successful in many single disciplinary fields into MDO may present tremendous implementation and numerical difficulties The reliability analysis and reliability based designs are highly expensive for MDO considering various disciplines that are dependent on each other or coupled Hence the present work

proposes a methodology of Sequential Optimization and Reliability Assessment for multidisciplinary systems design to improve the efficiency of reliability based MDO The central idea is to decouple the reliability analysis from MDO with sequential cycles of reliability analysis and deterministic MDO and hence to reduce the computational demand Abstract leaf

Multidisciplinary Design Optimization for High Reliability and Robustness ,2005 Optimization and uncertainty analysis considering multiple design criteria involves seamless integration of often conflicting disciplines Over the last 3 years Wright State University has been applying analysis tools to predict the behavior of critical disciplines to produce highly robust torpedo designs using robust multi disciplinary design optimization Multidisciplinary optimization and system reliability analysis were emphasized during the third year of the grant period and more reliable torpedo designs were obtained for all the different disciplines An optimal configuration of a supercavitating torpedo model that fits in a cavity generated by the cavitator was obtained An evidence theory based method to determine the reliability of the cavitator is presented Structural optimization of the lightweight torpedo model was done for it to be safe from underwater explosions and to reduce the acoustic signature Also reliability based optimization was performed for the lightweight torpedo model using system reliability constraints *Reliability-based Design Optimization of Series Structural Systems* Johannes Ovrelid Royset,2002 **Proceedings of the ... Research Into Design Amaresh Chakrabarti,2009 *International Journal of Vehicle Design* ,2001 Efficient Sequential Reliability-based Design Optimization with Adaptive Kriging Inverse Reliability Analysis Richard Walter Fenrich,2018 In this thesis new methods for reliability based design optimization RBDO are presented The Adaptive Kriging Inverse Reliability Analysis AKIRA algorithm and a multifidelity sequential RBDO algorithm are introduced and demonstrated on a complex multidisciplinary supersonic nozzle design problem AKIRA demonstrates competitive performance with other reliability analysis algorithms while also benefiting from the solution of the inverse reliability analysis problem during RBDO The proposed sequential RBDO algorithm mitigates the cost of solving the RBDO problem by decoupling the optimization and

reliability analyses thereby reducing its solution to a series of deterministic optimizations The method is motivated by anchored decomposition has guaranteed convergence inherited from trust region methods and is shown in certain cases to be a generalization of existing sequential RBDO methods It also derives enhanced efficiency by incorporating lower fidelity models when available The final demonstration of the proposed algorithms on an industrial type problem the supersonic nozzle shows that the solution of RBDO problems for complex realistic engineering applications is well within reach **41st AIAA/ASME/SAE/ASEE Joint Propulsion Conference & Exhibit 10-13 July 2005, Tucson, Arizona: 05-3700 - 05-3749** ,2005
