## **Children With Exceptionalities In:**

**Children with Exceptionalities in Canadian Classrooms** Margret Winzer, 2001 A comprehensive introduction to children with exceptionalities It stresses the psychological cognitive social and learning situation the unique difficulties faced by children who are exceptional the developmental consequences of various disabilities and the multiple types of interventions necessary to accommodate these students effectively in local schools *Exceptionalities in Children and Youth* Lyndal M. Bullock, Juane Heflin, 1991 Family Consequences of Children's Disabilities Denis P. Hogan, 2012-04-01 The Americans with Disabilities Act ADA and other national policies are designed to ensure the greatest possible inclusion of people with disabilities in all aspects of American life But as a matter of national policy we still place the lion's share of responsibility for raising children with disabilities on their families While this strategy largely works sociologist Dennis Hogan maintains the reality is that family financial security the parents relationship and the needs of other children in the home all can be stretched to the limit In Family Consequences of Children's Disabilities Hogan delves inside the experiences of these families and examines the financial and emotional costs of raising a child with a disability The book examines the challenges families of children with disabilities encounter and how these challenges impact family life The first comprehensive account of the families of children with disabilities Family Consequences of Children's Disabilities employs data culled from seven national surveys and interviews with twenty four mothers of children with disabilities asking them questions about their family life social supports and how other children in the home were faring Not surprisingly Hogan finds that couples who are together when their child is born have a higher likelihood of divorcing than other parents do The potential for financial insecurity contributes to this anxiety especially as many parents must strike a careful balance between employment and caregiving Mothers are less likely to have paid employment and the financial burden on single parents can be devastating One third of children with disabilities live in single parent households and nearly 30 percent of families raising a child with a disability live in poverty Because of the high levels of stress these families incur support networks are crucial Grandparents are often a source of support Siblings can also assist with personal care and consequently tend to develop more helpful attitudes be more inclusive of others and be more tolerant But these siblings are at risk for their own health problems they are three times more likely to experience poor health than children in homes where there is no child with a disability Yet this book also shows that raising a child with a disability includes unexpected rewards the families tend to be closer and they engage in more shared activities such as games television and meals Family Consequences of Children's Disabilities offers access to a world many never see or prefer to ignore The book provides vital information on effective treatment rehabilitation and enablement to medical professionals educators social workers and lawmakers This compelling book demonstrates that every mirror has two faces raising a child with a disability can be difficult but it can also offer expanded understanding A Volume in the American Sociological Association's Rose Series in Sociology Collaboration with

Parents and Families of Children and Youth with Exceptionalities Marvin J. Fine, Richard L. Simpson, 2000      **International Day of Persons with Disabilities - Children's Disabilities** Olaf Kraus de Camargo, Thorsten Langer, Nihad A.

Almasri, 2024-10-29 The International Day of Persons with Disabilities IDPD serves to globally promote an understanding of disability issues and mobilize support for the dignity rights and well being of persons with disabilities The theme of the most recent United Nations Day was transformative solutions for inclusive development the role of innovation in fuelling an accessible and equitable world It is in this spirit that Frontiers in Public Health is launching a new article collection inspired by this UN day with a specific focus on children with disabilities and how innovative public health solutions to support them can contribute to making the world a more equitable and prosperous world for all      Adapting Early Childhood Curricula for Children with Special Needs Ruth E. Cook, M. Diane Klein, Annette Tessier, 2008 This comprehensive practical book is built on solid theory and evidence based practices from both the fields of Special Education and Early Childhood Education When the first edition was conceived in 1980 the authors encountered students who either had a strong special education background or a strong early childhood child development background Each group had a lot to learn from the other and a lot to contribute to the other The original purpose was to bring together the best from both fields into Early Childhood Special Education The book continues to take a practical activity based approach that is theoretically sound and current It also provides ample detail related to specific intervention strategies that enhance the effective use of embedded learning opportunities within daily curriculum activities and routines Its relatively jargon free readable approach that is built on evidence based practices make it appropriate for a wide range of readers The illustrations of techniques and strategies throughout make it sustainable as a resource It has always encouraged a family centered inclusive approach to working with young children with special needs and their families      **Including Families of Children with Special Needs** Sandra Feinberg, 1999 Discusses how librarians can help meet the needs of families with special needs children up to age five focusing on the basic principles underlying inclusion family centered service resource based practice and the provision of library service to families and children with special needs      **Teaching Children and Adolescents with Special Needs** Judy L. Olson, Lisa A. Dieker, 2008 With collaboration so vital to today's educational arena this thorough well organized highly readable text concentrates on the general process of teaching the basic how to do it to help prospective teachers of children with mild disabilities in grades K 12 learn to work effectively with students other teachers and families Basing coverage on their extensive experience the authors present practical research based teaching strategies that relate to everyday occurrences in schools provide motivating experience based activities and offer numerous detailed lesson plans Their personal conversational writing style makes even complex concepts accessible while their extensive coverage gives readers a solid understanding of what works and what doesn't in both special education classrooms and inclusive settings For future teachers of elementary school students with mild disabilities and learning problems      **"Code of Massachusetts**

Michael Timpane,Roger W. Benjamin,2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America s future      **"Code of Massachusetts**
